Farm income down

WASHINGTON, D. C. - Recent price weakness is expected to hold net farm income this calendar year down from earlier estimates to around the 1975 level - with a modest gain in realized net farm income and a small decline in total net income, if the downtrend in cattle numbers about offsets expected increases in inventories of other livestock and some crops. In looking ahead to the latter part of 1977, returns to farmers will likely be better than the last half of 1976 and early 1977. This suggests that for calendar year 1977, average net farm income may be much the same as this year, according to a Summary of the Agricultural Outlook, issued by USDA last week.

Farmers realized net income was \$22.7 billion last year, their net change in farm inventories, \$2.9 billion, giving them a total net income of \$25.6 billion.

Goat meeting slated

WEST CHESTER, Pa. - Dairy goat owners are invited to attend a program at 7:30 p.m. on Thursday, December 9 at the Owen J. Roberts High School Vo-Ag room. The school is located at the junction of Route 100 and 23.

The program is being conducted by the Cooperative Extension Service. Penn State Extension specialists will discuss "Feeding and Nutrition", "Pneumonia and Parasites" and "Ventilation".

Goat owners are encouraged to attend this informative program. There will also be opportunities for questions and answers.

There are a lot of reasons you should buy a Surge pipeline.

Planning to stick with stanchions, but want to eliminate bucket backache? Save time and labor by moving up to a Surge Stanchion Pipeline

• Famous Alamo Vacuum Pump
A big dependable pump with important design differences. Features flood-type lubrication, filtered air intake, a large oil reserve, plus many more efficiency advantages.

• Tug & Pull Milking Action
One of the most important features of a Surge pipeline is famous "tug & pull" milking, the milking action that's helping thousands of dairymen get the best their cows can produce. All Surge milkers offer large capacity, visible milk flow, plus a special design feature that prevents the backwashing of milk from one quarter to another, greatly reducing the spread of mastitis.

• Rugged, welded stainless construction makes the Surge Pipeline vacuum tight and easy to clean. It's more economical to install and maintain, too.

When you add to these features self-adjusting milk valves, the compactness and efficiency of the Surge Pacemaker's receiver panel, and dependable service from the best trained dealers in the industry, you'll see why so many stanchion operators have chosen Surge.

A free \$100 watch is one more.

Place your pipeline order before Dec 31, 1976 and receive a handsome digital watch valued at \$100 absolutely free!
