Hired farmworker count remains stable

WASHINGTON, D.C. - The U.S. hired farm working force, numbering 2.6 million in 1975, has been relatively stable over the past five years, according to the U.S. Department of Agriculture. It averaged 2.7 million since 1970, compared with 3.4 million for 1961-65, the Department's Economic Research Service reported last week. Other highlights from last week's statistical report are:

Farmworkers earned an average of \$2,552 in 1975. Of this, \$1,488 was earned for an average of 85 days of farmwork. The rest came from nonfarm employment.

Over a million farmworkers were in school most of the year, so they earned only an average of \$492 for 41 days farmwork in 1975.

Last year, 335,000 farmworkers worked year-round on farms, earning an average of \$5,873 for 311 days of farmwork.

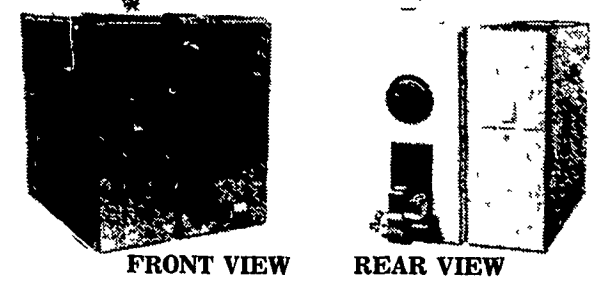

Persons employed over 150 days on farms did 68 per cent of the hired farmwork (measured by mandays of work). Yet, they comprised only 22 per cent of the hired farmwork force.

Hired farmworkers in 1975 were young (median age 23), and most were male (77 per cent).

Only 21 per cent of the farmworkers lived on a farm, while 7 per cent were migrants.

Most farmworkers were white (72 per cent), 11 per cent were of Spanish origin, and 17 per cent were blacks and others.

CUT FUEL COSTS WITH COMBINATION WOOD AND OIL FURNACES

- Saves Money - Easy to Install**
Relieves Fuel Problems and Costs
- Burns wood and oil in separate combustion chambers
 - Switches from wood to oil automatically
 - Twin 10" blowers for quiet efficient operation
 - Large fire box will take up to 24" wood
 - Ten Year Warranty on Heat Exchanger
 - Five Year Warranty on both combustion chambers
 - Positive draft control for greater efficiency
 - Both wood and oil fires thermostatically controlled
