

Tree seedlings available

LANCASTER, Pa. - Lancaster Countians, who want to plant trees, but find the idea too costly, will get some help in April from the Lancaster County Conservation District.

The Lancaster County Conservation District is offering ornamental evergreen and hardwood tree seedlings at low cost to County residents.

As in previous years, the District's goal in this project is to improve the environment. There is no

requirement or restriction as to how the trees shall be used. They may be planted for windbreakers, privacy, or in erodable areas to aid in the establishment of adequate cover and prevent erosion of valuable soil. Also, they may be planted for Christmas trees. Trees add beauty and aesthetic values to the surroundings of a home.

Tree seedlings offered are the evergreens - Norway Spruce, Blue Spruce, White Pine and Douglas Fir. Hardwoods available are... Sugar Maple, Red Oak, Scarlet Oak, and Flowering Dogwood (white). The seedlings range from six inches to eighteen in height, depending on the species.

Evergreen seedlings will be priced at 1 packet of 10 for \$1.50 and Hardwood seedlings will be priced at \$1.00 each.

All orders should be mailed, along with a check made payable to the Lancaster County Conservation District at the following address: Farm & Home Center, Room 6, 1383 Ar-

cadia Road, Lancaster, Pa. 17601. Further questions should be directed to the District Office at 299-5361.

The tree seedlings must be picked up at the J.C. Penney Mall, Park City, Lancaster, on April 16, 1977, between 10:00 a.m. and 2:00 p.m.

The District is not responsible for trees not picked up on Saturday, April 16, 1977.

Ham and Egg

Ham and eggs are a time-tested team Pan-fry slices of leftover ham and serve with fried eggs, stir bits of cooked ham in scrambled eggs or fold into omelets For a deluxe brunch, count on Eggs Benedict — toasted English muffins topped with hot slices of ham poached eggs and hollandaise sauce

TREE SEEDLING ORDER BLANK

The first flood in America of which there is any known record was that of the Mississippi River. It was recorded by Fernando De Soto in 1543!

**Think more corn profit/acre.
 Think Unipel® 20-10-10 fertility.**

Across the Corn Belt, more and more farm operators know that a corn fertility program including Ortho's Unipel 20-10-10 pays off consistently with higher corn profits per acre.

Late Winter and early Spring preplant applications of Ortho Unipel 20-10-10 have helped increase returns over fertilizer investment up to \$86 an acre more than blends and up to \$40 an acre more than a liquid program.

Five key ingredients in each pellet of Unipel 20-10-10 benefit corn with an uninterrupted season-long flow of Nitrogen, Phosphorus and Potash. Both Nitrogen and Phosphorus are present in quick and sustained feeding forms to provide both immediate and continued nutrient feeding. And adequate Potash rounds out the balanced Unipel diet to develop strong roots, sturdy stalks and leaves.

You can make unique, pelleted Unipel 20-10-10 your complete corn fertility program, or just part of it, depending on your yield goals and soil conditions.

We'll recommend the best Unipel fertility program for you to make the big difference in your corn profits per acre.
