

BANVEL®+LASSO®*

pre-emergence herbicide

A giant step toward total weed control in corn.

EFFECTIVE CONTROL OF BROADLEAF AND GRASSY WEEDS WITHOUT CARRYOVER PROBLEMS

What degree of weed control will you settle for in your corn? Most of the thousands of growers we've talked with on the Banvel® "Hot Line" seem to expect at least 90 percent control. And, most of them have been getting it with the pre-emergence, post-plant application of Banvel® + Lasso® tank-mix.

An important advantage of this combination which growers appreciate is freedom from worry about carry-over, particularly following a year of droughty conditions.

*LASSO® is a registered trademark of Monsanto Company. The Banvel® + Lasso® tank-mix is cleared for use in Colorado, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Montana, Nebraska, New York, North Dakota, Ohio, Pennsylvania, South Dakota and Wisconsin.

HOW TO ACHIEVE 90% OR BETTER CONTROL ON LABELED WEEDS

Here are the most important steps to successful results with Banvel® + Lasso® tank-mix:

- Apply Banvel® + Lasso® strictly according to soil type and percent of organic matter. The Banvel® + Lasso® label spells it out for you.
- Incorporation is not only unnecessary, it is undesirable other than under extreme drought conditions; even then, incorporation should be no more than ½-inch.
- If you apply Banvel® + Lasso® with liquid fertilizer, check compatibility of the liquids first by mixing proper proportions in a small container.
- Use the right kind of nozzles and screens. The label is specific on this point.
- This combination should not be used on any sandy textured soils.

Note: Before using any pesticide, read the label.

THE BANVEL® TOLL-FREE "HOT LINE" IS FOR YOU

Questions about Banvel® or its uses? Call the Banvel toll-free "Hot Line" 800-621-4129. Illinois callers 800-972-8381. Call between 9 a.m. and 4 p.m., Monday thru Friday. Calls placed outside of these hours will be automatically recorded and answered within 48 hours by phone or mail.
