plus destination charges

Here's what you have been waiting for. The new Starline Satellite 70R silo unloader that combines all of the advantages of the popular Model 70 with the special benefits of ring drive. You get the same high-speed auger that rips silage loose at 720 rpm... the same tremendous throwdown power... the same simple but sound engineering found in the Model 70—plus the advantages of ring drive. The ring holds the Satellite in the center of the silo to keep the pack level and free from coning. Positive ring drive powers the auger through the toughest silage.

Order by March 26 and you pay only the very special introductory price of \$1457.00\* for a 70R to fit your 16' silo. Comparable low prices on 18 and 20 ft. sizes. In many cases, an easy-to-install conversion kit will let you suspend the 70R from your present straight-leg tripod.

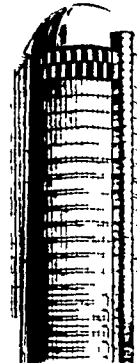

Put a new Ring Drive Satellite in your silo... and start unloading silage faster and easier than ever before. Call the Agway Farm Mechanical Center nearest you before March 26. Leasing to Agriculture and Industry

Agri-Lease
