New zinc increases wheat yields 10-20%

Allied Chemical's new zinc material—NZN® can do remarkable things for your wheat. When combined with URAN® nitrogen solution for wheat topdressing, NZN can boost wheat yields 10 to 20% over URAN alone. NZN is a more responsive zinc. It gets results even in areas where other zinc materials have been unprofitable. And it doesn't take much NZN, or much of an investment either. NZN is probably the most efficient zinc on the market today. Prove to yourself how profitable a little NZN can be. Topdress some wheat with NZN and URAN. Compare against URAN alone. We're convinced you'll wish all of your wheat had been topdressed the more profitable way with NZN and URAN from us, your ARCADIAN dealer.
