shelf and base extender options

A household word in Ireland, where the use and technology of solid fuel's has never ceased, the incomparable Stanley is now available for the first time in America.

AMPLE COOKING SPACE An even heated oven large enough to roast a 25 lb turkey, and a finely finished, cast iron hot plate that accommodates the everyday needs of most families.

VERSATILITY Wood, coal, coke, anthracite or peat all give excellent results. The optional hot water unit provides a large reserve of piping hot water while radiant heat provides a gentle warmth to your kitchen. It's virtually 3 units in 1 that offers cooking, hot water, and room heat.

EASY TO CLEAN Stanley's beautiful vitreous enamel finish needs no pampering—a quick wipe-over does the job. Inside, the constantly heated oven is virtually self cleaning.

FUEL ECONOMY Stanley's large airtight firebox maintains a fire for hours—even overnight! Twice a day fueling is economical and convenient.

Invest in a lifetime of comfort and service with a Stanley Kitchen Range—quality crafted by Waterford Ironfounders, Ltd. Write for the name of your local dealer!

Producers paid \$9.38 for February milk

NEW YORK, N.Y. - Dairy farmers supplying milk plants regulated under the New York-New Jersey marketing orders during February will be paid on the basis of a uniform price of \$9.38 per hundred pounds or 20 cents per quart. Market Administrator Thomas A. Wilson, who announced February's price also stated that the uniform farm price was \$9.42 per hundred - weight in January 1977 and \$9.80 per hundred weight in February 1976. The uniform price is a marketwide weighted average of the value of farm milk used for fluid and manufactured dairy products.

The total amount of milk received from the 18,994 dairy farmers supplying the New York - New Jersey Marketing Area was 710,505,871 pounds during February 1977. This was more than 31 million pounds below last year, however, February 1976 had an extra day. The gross value to dairy farmers for milk deliveries was \$67,873,073.28. Wilson explained that this included differentials required to be paid to dairy farmers but not voluntary premiums or deductions authorized by the farmers.

Regulated milk dealers (handlers) utilized 352,566,377 pounds or 49.6 per

cent of the total amount of milk for Class I. The Class I milk is used for fluid products such as homogenized, flavored, low-test and skim milks. For February 1977, handlers paid \$10.65 per hundred weight for the milk used in Class I products compared with \$11.48 a year ago.

The balance of the milk, 50.4 per cent, was used to manufacture Class II products including butter, cheese, ice cream and yogurt. For this milk the handlers paid \$8.18 per hundred weight.

The uniform price is based on milk containing 3.5 per cent butterfat. For February

1977, a differential of 10.4 cents was applied to the price for each one-tenth of one per cent that the milk tested above or below the 3.5 per cent standard.

All prices quoted are for milk received within the 201-210 mile zone from New York City.

She has
farm needs too.
Farm Credit
understands,
and they
can help.

A new kitchen, a washing machine, a freezer, furniture, her own car. Farm needs? They are to us.
