One good reason to own a Vermeer Baler:

# Experience.

Your Vermeer man represents a company that has sold more big round balers than all other makes combined. A company that leads the industry in experience in virtually all conditions, in practically all types of hay. And, best of all, he offers you the best giant round baler on the market ... at any price!

For a firsthand look at America's No. 1 best-selling giant round baler, call or visit

# OUR NAME IS

Now you can **SEALSTOR®** feed for both your livestock and your land.

### The Oxygen Limiting SEALSTOR System

For the past 27 years, the makers of Sealstor systems have manufactured thousands of quality glass-fused-to-steel products for agriculture and industry. Today, we offer a complete range of sizes in forage and grain structures. Before you buy any oxygen-limiting, top-loading, bottom-unloading feeding system, check Sealstor's features. Poured for pound, our fiber-glass roof is stronger than steel. It has fewer panels, fewer seams, fewer bolts. It absorbs less heat. The steps are recessed in the roof for safety and the dome shape provides more useable storage space. (Grain and Forage structures — 6,000 to 42,000 bushels.) Our rugged, sweep-arm auger unloader has no costly chains to break. "Short-arming" is unnecessary. Yet you get higher volume, push-button feed delivery.

### The SEALSTOR Liquid Manure Control Center

Sealstor offers the widest range of sizes in glass-steel liquid manure storage structures. You can start with a 10' or 15' above-ground height and later expand to a 15' or 20' height. For additional strength, all vertical seams are double-bolted. For more positive containment, more sealant is used. (Liquid Manure storage tanks — 60,000 to 750,000 gallons.)

It's your money. Send for the facts. We believe you'll select Sealstor.

and anything they can do ... we can do better!

Sealstor products are manufactured by Southwestern Porcelain Inc. P.O. Box 8 Sand Springs Oklahoma 74063
