

Beat the weather

Get the most feed value out of your hay with Beacon Hay Pre-Serv*

You get more milk per ton of hay when you treat your hay with Beacon Hay Pre-Serv. Hay Pre-Serv lets you cut hay as much as 26 hours earlier, at moisture levels up to 25%.

This means a larger hay crop, with less leaf loss and shattering, and less risk of weather damage. Hay Pre-Serv is easily applied to baled, chopped or stacked hay and prevents mold, spoilage, oxidation and excessive heating.

You get better color, improved palatability and more digestible nutrients in every ton of hay you cut.

If you grow succulent forage crops, make the most of them with Beacon Silage Pre-Serv.* With Silage Pre-Serv you can harvest at moisture levels from 40 to 70%, and get as much as 30% more feeding value per ton of roughage.

The only northeastern company offering a complete, reliable preservative program for the farm
