"SERVICE IS OUR GREATEST ASSET"

Before you buy a big blue... check the top and bottom too.

Now that you're ready for oxygen-limiting feed storage and automated livestock feeding, you have a choice. Ours and theirs. Ours is Sealstor. We give you permanently bonded glass-to-steel construction. We give you closer bolt spacing. We offer more sizes. And more useable storage space in comparable size structures.

Our domed, fiber-glass roof.

Pound for pound our fiber-glass roof is stronger. Our dome takes fewer panels and fewer seams and bolts to assemble. It is extra tight. And we recess the breather bags high up in the dome, giving you extra useable storage space.

Our rugged bottom unloader.

This massive, sweep-arm auger unloader is proved by years of service in hundreds of forage structures. There are no costly chains to break. "Short-arming" is unnecessary. You push a button and get higher volume feed delivery than with any other bottom unloader.
