

Buy Less Feed.

Use Beacon Silage Pre-Serv*

and get up to **30%** more feeding value

from your grass silage or haylage.

Now you can lock in the fresh-cut feeding value and palatability of your succulent forage crops—even with moisture levels up to 65%.

Beacon Silage Pre-Serv prevents heat build-up, controls oxidation and fermentation, and greatly reduces spoilage and shrinkage. Treated silage has less seepage, and saves handling time because there is less

lumping and bridging in the silo. Get up to 30% more feeding value from every ton.

Discover the benefits also of Beacon Hay Pre-Serv*. It permits you to harvest hay up to 26 hours earlier; allows cutting and storing hay with as much as 25% moisture; provides more feeding value than with untreated hay.
