

NORTHCO CAGE LAYING SYSTEMS

Good to the last bird

Pipe with saddle mounts spaced to fit any type cage arrangement.

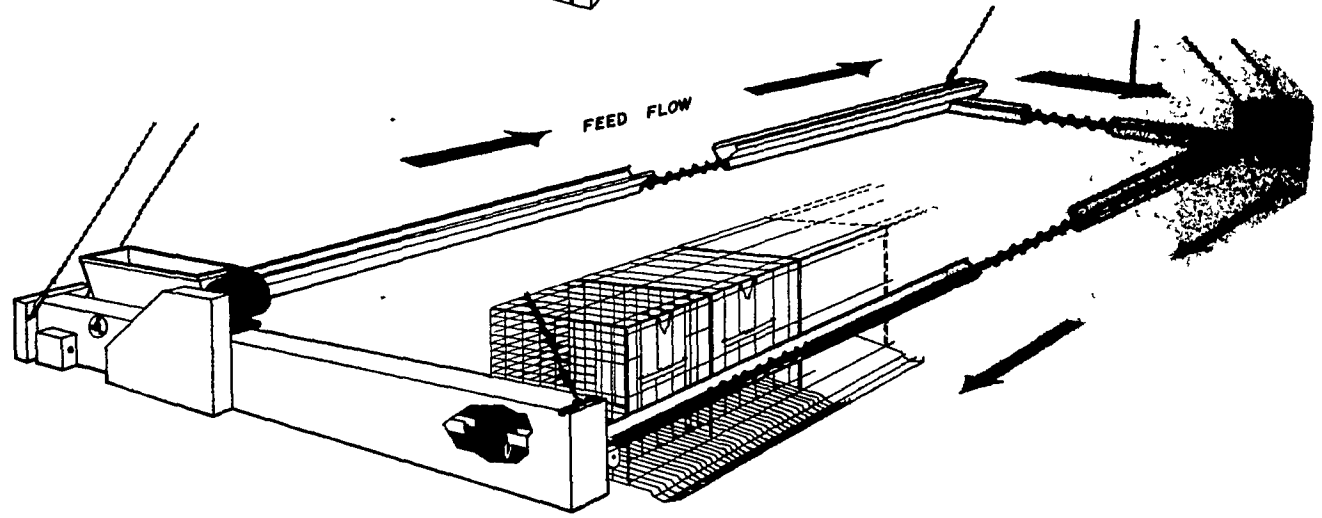

Insert stem into saddle mount and twist clockwise. O-ring seal

Plastic clip holds pipe, stem, and cup in position.

Precision 2-way stainless steel valve.

Raise and twist adjustment insert for easy cup removal and water level adjustment

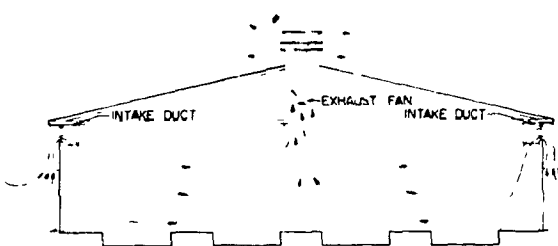

A self cleaning cup is maintained because accessibility is not obstructed by external triggers or valves

Horizontal Cage Feeder

There's no need for a feed mixing wheel in the hopper because Northco's core auger continually mixes the feed along the entire feed line. That means Northco's Cage Feeder helps insure that all your birds get the same ration. The cage feeder drive unit uses simple sprockets and chain. Simple design means reduced wear, fewer mechanical problems and longer equipment life.

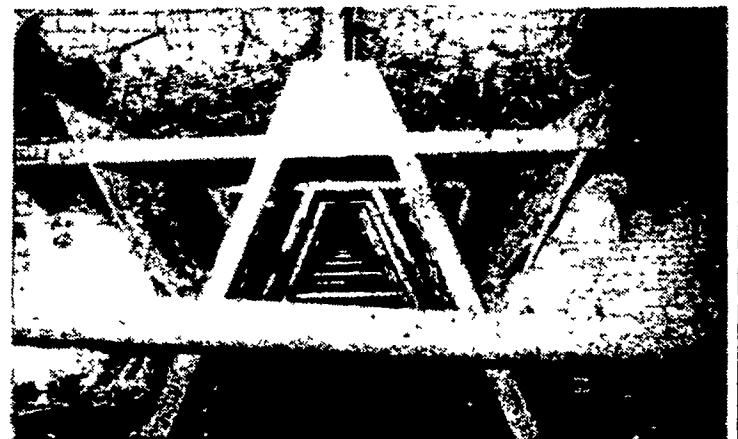

Roof Exhaust Ventilation

Northco's Roof Exhaust Ventilation System is based on Mother Nature's principle that cool, dry air falls and warm air rises. Fresh air enters through the sidewall intake ducts and quickly falls to the floor because it is cooler and dryer than the air in the building. As this air warms and expands, it picks up moisture and gases and is removed by roof exhaust fans in the center of the building. The down and up air motion fits in perfectly with the A-Frame design of Northco's Slant-Back System.

Vinyl Dropping Shields

eliminate the headaches of dropping boards and dropping board scrapers. Manure slides off the dropping shields and into the pit.
