# Put it all together!

The Babcock B-300V is rapidly reestablishing herself as the world's top layer. Egg producers with flocks well into production are reporting performance they haven't seen for years... from any layer. In many cases, in fact, they are reporting their best performance ever.

But in this business, potential is only half the game. Babcock backs its bird with the most professional, experienced distribution team in the egg industry.

Consider these features:

### PRODUCT

The B-300V rates "excellent" in all key indicators of profitable performance:

\***EGG PRODUCTION** -- The B-300V peaks high and early, for quick recovery of your costs, and early profitability. Her persistency after peak translates to top egg production.

\***FEED CONVERSION** -- The B-300V has a proven ability to efficiently convert feed to eggs. From 1966, until 1973 when she was withdrawn from Random Sample Tests, she was the top average feed converter in the industry.

\***LIVABILITY** -- Field results from all B-300V flocks in production since her reintroduction in late '76 indicate she may have far-and-away the best livability in the business.

\***EGGSHELL QUALITY** -- Eggshell strength is one of the greatest assets of the 1977 B-300V. Between 1972 and 1976, shell strength of eggs produced by B-300V's has improved by a measured 15% in early lay (36 weeks) and 30.8% in late lay (68 weeks).

\***RESISTANCE TO STRESS** -- We call it "manageability". The B-300V is a calm, adaptable bird. She resists environmental stresses and recovers rapidly from management problems.

### SERVICE

The Babcock distribution team has developed service programs to provide each individual grower or egg producer with the optimum product for his specific operation:

\***DELIVERY** -- Careful, on-time and courteous.

\***QUALITY PRODUCTS** -- Birds are hatched and/or grown with Babcock technical assistance. Uniform, healthy chicks and started pullets are vaccinated for your area challenges, and are correctly and fully-developed for their age.

\***SERVICE** -- Experienced, professional service is available before, during and after delivery.

\***FLEXIBILITY** -- Babcock distributors are equipped to supply the needs of your operation, whatever the size of your order. Cage or floor grown started pullets are available, depending on the needs of your program.

Talk to a professional about your next replacement flock. The businessmen behind the businessman's bird have a performance package tailored to your chick or started pullet program.

Quality and service. Put it all together with Babcock!
