

Livestock market

Omaha

Compared with the previous week's close: slaughter steers 50-75 lower, heifers 25-50 lower. Cows 3.00-3.50 lower and bulls 3.00-4.00 lower.

Four day receipts 19,500 as compared 20,400 previous week and 20,100 a year ago. Fed cattle prices were forced downward for the seventh successive week in reflection of continued liberal slaughter and an unresponsive carcass trade. Day-to-day price declines were not severe, but the downward pressure was persistent. However, demand remained fairly good by most buying interests as they sought to keep an acceptable ratio between live prices and carcass realizations; supplies were well distributed over the trading period. The steer run included a fair percentage of Choice grade but there was also an increased volume of Good and Low-Choice 975-1050 lb. shortfeds. Much of the dwindling heifer supply was of the Good to average-Choice variety with the price differential between steers and heifers usually narrow. Slaughter steers made up approximately 50 and heifers

28. Cows comprised 14 and feeders 6.
