

Sandy Miller is Berks County Dairy Princess

By LAUREL SCHAEFFER
Berks County Reporter
WYOMISSING, Pa. — When emcee A. Wayne Readinger, regional supervisor of the Pennsylvania Department of Agriculture, posed the question; "Can you dream up something new for the dairy industry...?" Sandy Miller, Hamburg, R2, didn't have to hesitate one second to answer.

The lovely Dairy Princess contestant gave a long list of suggestions such as milk flavored lollipops shaped like a cow, and milk fountains to replace the traditional water fountains in public buildings.

Sandy was crowned the new 1977-78 Berks County Dairy Princess before a crowd of well over 200 at a banquet held at the

Sheraton-Berkshire Inn on June 18.

The "moment of glory" came for this blue eyed, 5 feet-7 inch, 19 year old only after a long week of activities with the other seven impressive contestants. They were involved in dairy promotion activities throughout the week at the Berkshire Mall, and also participated in a fashion show sponsored by

Pomeroy's, and many other clinics and workshops designed to educate and help prepare the girls for the climax of Berks County's Dairy Week: the Pageant.

During the banquet, while the judges were deliberating on their final decision, past dairy princess Nedra Jo Yoder, gave her farewell remarks. Nedra highlighted on her past experiences as being Berks County's Dairy

Princess and thanked the dairy farmers who had made the opportunity available.

Nedra traveled 1,355 miles during the past year, making public appearances at many

various places as princess.

Comments were also by Peggy Staub,

Berks County's Dairy Pageant winners are all smiles about milk. The new princess is Sandy

Miller, center. Sue Clay, left, is second runner-up, and Martha Herbert is first alternate.

CUSTOM BUILT CALF HUTS

MADE TO ORDER

Build a separate pen in front of each calf. Space each pen and calf far enough apart from the next unit to keep each calf separated from its neighbor. This isolation of each unit is very important...It helps prevent the spread of infectious diseases.

Straw or other suitable bedding is used for floor. The calf is a proven design that provides dry, draft-free shelter for the animal result...a much healthier calf!
