Adams Co. is first in orchards

GETTYSBURG, Pa. - Adams County ranks first in the state in the production of apples, peaches, and pears, and the majority of that fruit is grown in a "fruit belt" area about four miles wide and ten miles long, located on the eastern slope of the South Mountain, near Gettysburg. There farmers seem to be following the trend of planting smaller trees of the dwarf and semi-dwarf varieties in denser plantings.

The reason behind smaller trees in close density plantings is that the trees are more economical and easier to manage. There is less labor involved in pruning the trees and picking the fruit. Harvest help is usually easier to get. The smaller trees seem to come into bearing earlier in the season. Spraying equipment is smaller and less expensive.

Orchards tend to produce better where they have a gravelly, sandy soil in a hilly area. Hills are important because they protect the orchard from the stiff winds coming over the mountain, give good water drainage to the area, and they provide good air drainage from the breezes. Hills are usually warmer than the valley area below them and the moisture dries quicker. These conditions all add to making excellent orchards. Most of these conditions can be found in the "fruit belt" area of Adams County.

The fruit crop this year in Adams County, according to County Extension Agent Thomas Piper, should be somewhat better than last year but still slightly below normal. This is because of weather conditions at pollination time in April when there was frost.

For the future years ahead, Piper sees Adams County's main problems

being in the area of markets and labor. He predicts larger crops over the next five years and this may affect both the price of fruit and the labor needed in the orchard industry.

4-H club meets

MANHEIM, Pa.—The Saddle Cinches 4-H Horse Club met July 11 at the home of Kim Bernhardt, Manheim. Discussed during the business meeting were the open horse show planned for August 20 at the Lancaster Riding Club, the county roundup, the one day trail ride planned for July 30, and fall plans. Members were encouraged to go out and get sponsors for the horse show.

The following people

qualified to represent Saddle Cinches in the grooming and showmanship class at the county roundup: Senior division - Robin Tshudy, Regina Kicera, and Terri Mummau; Junior division - Ginny Ruhl, Denise Travitz, and Lisa Cope.

The next meeting will be held July 27 at the home of Lisa Cope, Manheim.

COLLENBERGER

CONCRETE

"H" TYPE FEED BUNKS

Approximate weight 4000 lbs.

Featuring

- Large Capacity
- Steel Reinforced
- Movable — for future expansion
- Strong enough to support a roof and feeder
- No corners to retain spoiled feed

INSTALLATION OF BUNKS

We have the necessary equipment to handle and install these heavy bunks. Customer shall make roadway to feed lot passable for our delivery truck.
