

Market report expanded

WASHINGTON, D. C. - A USDA report that gives a national picture of broiler market conditions has been expanded to make it more useful to the broiler industry. Issued each Tuesday, this "broiler market at a glance" report now contains additional information on the current week's and next week's supply and demand

situation. To compile the report, market reporters with USDA's Agricultural Marketing Service (AMS) contact more than 100 buyers and nearly 150 processors throughout the country each week.

The report contains buyers' and processors' views on such market conditions as current and

next-week demand, market "undertone" - that is, the sense of direction in an unsettled market situation - and the current and previous week's average live supply and weight.

Ray Wruk, AMS poultry market news chief, said the report was expanded in response to requests from poultry buyers and sellers. The information is available from federal-state poultry market news offices

Corn and soybeans highlighted at ag field day

NEWARK, Del. - Farmers and other members of the agricultural community will have a chance to look at current research and Extension efforts into improving the production of corn and soybeans at the upcoming Field Day at the University of Delaware's College of Agricultural Sciences. The event will be held Friday morning, August 5, from 9:30 to 12:00 noon at the University's experimental farm in Newark.

The Field Day will consist of wagon tours of field demonstration plots and will emphasize some of the College's most recent and innovative research efforts on behalf of feed grain production in Delaware.

BIG FARM POWER AND EQUIPMENT

The Steiger cab is rock solid, with two doors allowing entry and exit from either side. Heater and air conditioner are standard, so is AM/FM radio and stereo tape deck. The comfortable and quiet environment inside the slightly pressurized Steiger cab helps ensure that when you climb down at the end of the day, you will be less tired and more relaxed.

Owners Say...
STEIGER
COMFORT
HELPED INCREASE
PRODUCTION!

Joe Hopewell, Bloomsburg, PA:

"It's very comfortable. It's attractive to the hired men. We use four operators going around the clock and there is always a fresh operator waiting to go. I like the seat. It's especially good for a big person like me. The air conditioning helps keep me from getting tired. It all adds up to getting more man hours out of each individual operator. As far as handling, it's the biggest surprise you ever saw! You think it's going to be awkward and then after you're in it an hour it settles right down and it gets smaller every hour. And no problem at all on the hills."

Lester and Marlin Smith, Lebanon, PA:

"The cab is quiet and you can really see out of it good. If you have the radio you don't even hear the tractor running. The seat sits just like your pickup or car, no vibration at all."

**Richard Kreider,
Noah Kreider
& Sons**

"We had no problems turning in our fields - we used the Steiger in all our fields. It's just like anything else, when you learn to operate it you can use it anywhere."

**Richard Waybright,
Mason Dixon Farms,
Gettysburg, PA:**

"The cab is very quiet...when you decide to chisel plow at 1:00 in the morning, the cab is so quiet to work in you don't realize how loud the Steiger is. I got so many complaints from the neighbors that I've not done that again!"

Mike Wright

The Steiger is quieter than any other tractor we ever had. It has many features that I like. We are doing the work of two tractors with one Steiger."
