Build your own pre-starter ration for half the cost.

Feed Creep Wean No. 3

If you're in the business of farrowing pigs, there is only one sure way to save on feed costs — right from the start. That's why Vigortone developed Creep Wean No. 3.

This highly fortified pre-mix makes it possible for you to build your own 18% pre-starter ration for about half the cost of a commercial product.

You'll be surprised how much easier it is to get baby pigs on feed fast with this freshly ground ration and how trouble free they stay right on through weaning.

Save big on Vigortone's starter, growing and finishing rations, too.

The reasons for the superior per-

formance of Vigortone fortified corn-soy rations are simple: the pigs are assured the essential balance of amino acids and the proper levels of major minerals, trace minerals and vitamins all the way to market; and you only pay out-of-pocket for ingredients you don't grow on your own farm.

Better feed conversion means lower cost

Each Vigortone corn-soy feeding program has been designed to promote better feed conversion and lower costs. If you'd like more information, see your nearest Vigortone serviceman soon.

Learn why more pork producers are feeding Vigortone — especially now.

Over 150 Servicemen in Penna. alone!

Better rations cost less . . . with Vigortone.
