(Continued from Page 22)

Countian Daniel Hunsberger had a fouth in the class.

A class of 13 senior earlings saw Perry ounty's Brian Rock of andisburg check in with the econ-place entry. Bruce and Kathy Rhein of Pine Grove, were third and fourth, respectively.

First place ribbons continued to elude 4-H'ers and FFA-er from this area in the 2-year old class. Dawn

Ridinger from Biglerville had the second-place animal, to be the only individual from this part of the state to break into the top six. The best anyone from this area did in three and four year olds was an eighth place by Kathie Rhein from Pine Grove. Fourteen cows were shown in that contest. Craig Rhein, Pine Grove, showed the third-place aged cow, leaving J. Curry Wagner with a fourth.

champion female, "Innisfail Princess 179th," a senior yearling heifer. Another Sandy River Farm entry, "Sandy River Molly," a senior heifer calf, was awarded reserve junior championship honors.

The grand champion bull was "Innisfail Promise 63rd," a 3-year-old exhibited by the Sandy River Farm.

"Promise," also named senior champion, won the same award at last year's show. Sandy River Farm's "Sandy River Larry," a bull calf, was named reserve grand champion and junior champion bull.

The reserve senior champion bull, 4-year-old "Hutchinson's Promise Duke," was exhibited by the Hutchinson Farm, Dixfield,

Maine. Pinesedge Farms, showed the reserve junior champion bull, "Kingsdale Rosie's Prince," a bull calf.

The premier sire award went to "Tabbagong Flora's Prince," from Australia. The All-American Milking Shorthorn Show was judged by John A. Sims of Shawano, Wisconsin.

4-H week

(Continued from Page 1)

4-H projects and activities are supervised by nearly 10,000 county agricultural, home economics, and 4-H agents. These extension professionals are assisted by more than 570,000 volunteers - adults, teens and juniors - who give leadership to local clubs, special interest groups and other activities.

The private sector, represented by thousands of businesses, foundations and individuals, contributes financial and technical assistance at local, county, state and national levels to help strengthen and expand the 4-H program.

Twenty-two and four-tenths per cent of 4-H members now live on farms, and an approximately equal percentage (22.7 per cent) live in suburbs and cities of more than 50,000 population. Thirty-eight and four-tenths per cent live in towns of less than 10,000 population, and 16.5 per cent in towns and cities of 10,000 to 50,000.

1977 marks the 75th anniversary of the youth education movement that was to become 4-H. Around the turn of the century, school superintendents and teachers in many different places saw the need for supplementing the traditional "Three R's" of the one-room rural school with practical, real-life training for farm y, th. In 1902, young people began to meet in informal groups, or clubs to experiment with corn and hog raising, soil testing, vegetable and flower gardening, and home can-

Formal provision for boys' and girls' club work, later to be called "4-H," was made in the Smith-Lever Act of 1914, which established the Extension Service.

Five 4-H features can be found in this week's Lancaster Farming.

AGWAY

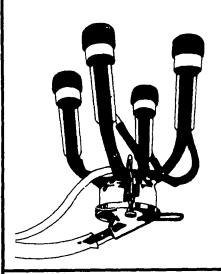

HEADQUARTERS FOR MILKING EQUIPMENT

Give up lugging milk forever!

Agway Pipeline System

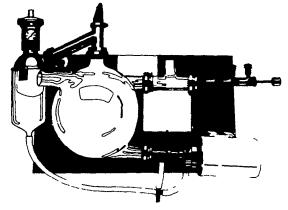

- Pumps milk from stanchion to bulk cooler automatically
- Helps maintain milk quality and reduce bacteria count because milk cools faster
- Reduces costly manhours

See precisely when to remove teat cups!

Universal full view milker

Transparent polysulfone cluster allows you to see milk leaving each teat. You never over-milk because you see milk flow. Large size reduces vacuum fluctuation. Saves time, too.

The panel with built-in convenience

Universal full-control milkhouse panel

- Easy to maintain, operate and clean
- Controls switch from "milk" to "wash" in seconds for fast, thorough pipeline cleaning
- Automatic self-drain for complete drainage

Cool milk from 20°-25° with well water

PRE-COOLING SYSTEM by Top Line

The pre-cooler from Top Line uses well water to cool milk from 20-25 degrees in line before it hits the tank. This in-line pre-cooler can cut compressor time in half, reduce power costs by taking the strain off your condensing unit and relieves the refrigeration load on your bulk tank. Easy to clean in place and easy to install. Sized to fit your system.
