WHO'S MINDING THE MILK?

If you depend upon your milk check for a living, who's minding your milk?

The least expensive, one-shot insurance you can get is the Sentinel — the 10-inch recorder which charts temperature of your milk-cooling or holding tank. Here's what it provides:

- Permanent proof that proper temperature was maintained.
- Record of cooling equipment efficiency
- Cleaning temperature recording on the same chart.

The Sentinel is also available with provision for actuating an alarm or warning light if pre-set temperature is exceeded

Remember — if it prevents the loss of only one tank of product, the Sentinel has paid for itself. It minds your milk
