

At National Central Bank

# Darvin Boyd named director, Stanley Musselman retires

LANCASTER - Darvin E. Boyd has been named director of National Central Bank's Agri-Finance Department following the retirement of Stanley Musselman according to Donald M. Cooper, executive vice president and head of the bank's Loan Group.

Boyd, who has had a broad background in agriculture

and government, will coordinate the agriculture services of the bank's 50 offices in Berks, Chester, Dauphin, Lancaster, Lebanon and York counties.

Boyd said that National Central Bank realizes the importance of preserving family owned farms in this area.

Boyd received his BS degree in animal husbandry

in 1964, financing his education through proceeds he earned from his 4-H Club projects.

In 1964 he served as Grassroots Ambassador of Friendship and Goodwill to the Republic of Korea in the International Farm Youth Exchange Program. In 1966 he received his masters degree in public administration from The Pennsylvania State University.

The Lititz and Ephrata area native then spent six years as 4-H program director for the America-Korea Foundation, Inc. where he was responsible for the development of the rural youth program in the Republic of Korea.

For his work in Korea he received numerous awards and citations including the National Order of Civil Merit and Citation from the Republic of Korea and a citation from the Korean Minister of Agriculture and Forestry.

More recently Boyd turned to government service in Pennsylvania serving as executive director of the House Committee of Health and Welfare for the Pa. General Assembly.

In 1975 he served as associate legislative research analyst for the

Darvin Boyd

ministration and the American Academy of Political and Social Science. He is a member of the Ephrata Church of the Brethren.

Musselman, a prominent figure in agriculture and the related field of agriculture finance has concluded a 36-year career which gave him an opportunity to know and help a large number of the farmers in the six counties served by National Central Bank. Agriculture was both his vocation and avocation.

He was happiest when helping youngsters who were interested in farming, and they reciprocated with numerous awards. Most notable were honorary degrees awarded by the Pennsylvania state associations of the Future Homemakers of America and the Future Farmers of America.

A graduate of Fairfield, Pa., High School, Musselman received his B.S. degree in agriculture education at The Pennsylvania State University and his M.A. is guidance and counselling from Arizona State University.

He started his career as a teacher of agriculture in

Dover Twp. in 1941 and subsequently taught agriculture in Adams County and Southern Lancaster County Joint Schools.

He turned to banking in 1955 when he joined The Lancaster County National Bank, a predecessor to National Central Bank, as director of farm relations.

The Quarryville resident is married to the former Dr. Miriam Schlegel of Millersburg, who is a professor of education at Juniata College, Huntingdon.

The agriculture specialist has served on the boards of the Agriculture Extension Service, The Lancaster County Poultry Assn. and the 4-H Development Fund, Inc.

He is also a member of the Lancaster Association of Commerce and Industry; Alpha Tau Alpha, the professional agriculture education fraternity, and served as an elder and president of the consistory at St. Paul's United Church of Christ. He had been chairman of the Youth Committee of the Lancaster County Bankers Assn. for 15 years.

## WHAT ARE YOU WAITING FOR, MR. DAIRYMAN?

Oh, you say you haven't got the results back yet on those forage samples you sent to the that other lab? You say it's been two weeks, and you wouldn't be surprised if it took **two more weeks?** But you know that when those results do finally get there, the forage you'll be feeding then could be a lot different from the material you sampled four weeks earlier. And that means those results won't be as valuable to you as they might have been.

But if you had sent those samples via First Class Mail to the New Jersey Feed Laboratory, Inc., you would have had your results at least a week ago! That's right, seven day service is what our eastern states customers get from us. Why, we even have customers in **California** who say they get speedier service from us than from their homestate labs!

And we do this with no loss in accuracy. Pitted against over 100 other commercial and state labs in a monthly collaborative check sample, we consistently score in the top 25%.

And take a gander at the prices:

**Moisture, Protein, Fiber, and TDN or ENE . . . . \$10.50**  
**Same as above plus Calcium and Phosphorus . . \$22.50**  
(deduct \$1 00 for dry hay or ear corn samples)

So what ARE you waiting for, Mr. Dairyman? Send your 3 - 4 oz. sample with a check in the proper amount today to:
