

Livestock Exposition

Pennsylvanians fare well in swine competition

James Parlett, Airville, was one of two Pennsylvanians to show three grand champion barrows on-foot at the Keystone International Livestock Exposition. Parlett's Chester Whites, shown here, were grand and reserve grand champions of their breed as well as littermates. Parlett also showed the Crossbred champion, a Chester White-Hampshire.

By JOANNE SPAHR
HARRISBURG - Pennsylvanians fared well in on-foot barrow competition at the 21st Keystone International Livestock Exposition on Sunday and Monday of this week.

Although the grand champion overall, went out of state to the Weller Brothers of Dwight, Ill., for their open show champion, Penn State University shared the spotlight, taking the reserve grand champion title, overall, with a Duroc that was first named the open show reserve champion, as well as the top hog in its breed.

To choose the grand champion of the entire show, the champions and reserve champions of the open show were pitted against junior show champions.

Penn State's high placing Duroc was a 225 pound middleweight sired by M.L. Champ. In the open Duroc

show, the university swept all competition, taking first placings in each class and both champions of the breed. They also had the champion truckload of six hogs which were all sired by a boar bred at Dutch Valley Farm, Manheim R5.

Three other breeds in the open show were dominated by Pennsylvanians, as well. In the Chester White and Crossbred shows, James Parlett, Airville, showed both grand champions as well as the reserve champion of the Chester White competition.

All three barrows were homebred and sired by the same boar, Masterpiece. The grand champion Crossbred barrow was a 235 pound Chester-Hampshire cross. Parlett's Chester White champions were lit-

termates weighing approximately 240 pounds each. The grand champion was first in the heavyweight class, and the reserve champion was second in that class.

In the Hampshire division, animals shown by John Strawbridge, Stewartstown, R1, swept all the weight classes, taking first, second, and third in each class, as well as reserve and grand champion.

Strawbridge's grand champion Hampshire was sired by K. M. Kilmore, and weighed in at 220 pounds. The reserve champion Hampshire was a heavyweight weighing 232 pounds, and was sired by Ironhorse 73-3. Strawbridge bred both top animals.

You're looking at money in the tank.

The nutrient content in manure will vary from farm to farm. However, with proper storage, the value of NPK coming from the spreader will often test out to be worth 2 to 2½¢ per gallon.

Because your Sealstor® Liquid Manure Control Center is filled and unloaded through the bottom, the protective crust that forms over the top is not

disturbed. This crust deters flies and odors, and prevents oxidation. Leaching is eliminated. The natural nutrients in the manure are preserved.

Every animal on your farm is a source of valuable NPK. You can waste it through runoff, leaching and oxidation or you can Sealstor it in the tank, and put more money in the bank.

Glass, fused to heavy gauge steel, gives a smooth, nonporous surface, resists rust, is impervious to acids and corrosion.

Sealstor double-bolt construction provides more strength along vertical seams. More sealant assures a tighter structure.

In our modern plant we have been manufacturing glass-fused-to-steel products for 27 years for industrial and on-farm use.

Manure is scraped or drained to a ground-level hopper, pumped underground and up through the bottom of your Sealstor Manure Control Center.

Sealstor products are manufactured by Southwestern Porcelain, Inc.
