

© 1977 AGRO-K CORPORATION

Not long ago
agronomists advised
farmers to try
nitrogen fertilizer
on just a few acres
to prove its
effectiveness

Today
we'd like you
to try
SYMBEX™

*U.S. Patent Pending

SYMBEX is a new product, but the way it works is as old and proven as your soil.

SYMBEX is a unique grouping of naturally-occurring soil microorganisms suspended in a patented* enzyme and nutrient base.

SYMBEX stimulates microbial action in your soil to ...

1. Speed decomposition of crop residue
2. Promote the nitrogen-fixing capability of soil bacteria
3. Increase humus formation, which will ...

- Build soil fertility and tilth
- Enrich crop quality
- Boost crop yields and dollar returns
- Minimize leaching of plant nutrients and pesticides
- Improve moisture-holding capacity of your soil
- Provide stronger disease resistance through antibodies produced by soil microbes.

SYMBEX is not harmful to humans or animals, and carryover is not a problem.

SYMBEX application is simple and can easily be included with your 1977 crop.

MAKE a test strip and evaluate results. Just a few acres this year will change the way you farm.

Please mail coupon for Free 16-page SYMBEX brochure.

...Soil Inoculant for
Accelerated Decomposition
of Crop Residue
and Nitrogen Fixation
