

“For the serious dairyman who’s shooting for more tons of silage, I think Furadan is a good solution. Because it controls those insects that cut yields in this area.”

Chuck Dodd, Warren County, Pennsylvania

“Insect problems can cut silage yields in half in this area. Some guys think I’ve got a different type of fertilizer or something, but the only difference is Furadan.”

Donald Zittel, Erie County, New York

“I figure that where I didn’t use Furadan, I lost 10 to 20% of my tonnage—I saw goosenecked stalks, rootworm and wireworm damage.”

Allen Mammöser, Erie County, New York
