PTO & ELECTRIC MODELS AVAILABLE

JILCO
Model PTO-8
ONLY
\$6573 F.O.B.
160 Bu./Hr. drying & cooling cap
10 point drop

JILCO DRIES GRAIN FASTER AT A LOWER COST WITH THESE LATEST IMPROVEMENT FEATURES:

10 INCH DRYING COLUMN

Panels are stamped with louvered slots rather than perforated holes which permits more efficient air flow and uniform drying, increased rigidity and avoids plugging. Compare drying column design before you buy.

LARGER FAN - MORE CFM

Runs half the speed (1800 RPM), lower noise, less vibration, less horsepower, adjustable blades produces more air per CFM. Compare CFM and HP before you buy.

RAM JET BURNER

Runs half the speed (1800 RPM), lower noise, less vibration, less horsepower, adjustable blades produces more air per CFM. Compare burner features before you buy.

THREE STEP TEMPERATURE DRYING

More efficient than single temp drying because only wet grain can tolerate high temperatures and absorb heat. In a JILCO, the plenum temperature is automatically reduced in three steps with sensors as the grain is drying. This prevents grain damage and also saves fuel.

Compare variable temperature available before you buy.

Financing by Bank, ASCS, or Production Credit. Also 5-year Leasing Plan.

INSTALLATION —

1. You set up. We rent you jacks & impact wrench.
2. Installation with supervisor, tools - you provide labor.
3. Experienced crew makes complete installation on contract basis with installation. Performance guarantee.

The 7% price increase on Hunter equipment effective Feb. 1 has been postponed till Feb. 28. So hurry and get that order in to our office before the 28th to get your Hunter equipment at the old price.

IF IT'S HUNTER...  IT'S A HONEY!
