

Leonard Seltzer says CLAW HITCH on my 966 International saves me 15 to 20 minutes every time I hook up. It's easy to switch from Category II to Category III equipment and it doesn't interfere with drawbar or PTO operation. Its simplicity far surpasses any other quick coupling system.
—Leonard Seltzer, Manhattan, Illinois

Don Jaedike says, CLAW HITCH is simpler. You just back up, raise the claws, drop the third link and you're going. No wrestling with heavy equipment. I have Claw Hitch on both my 4430 and 4020 John Deere tractors. Installed them myself about a 5-minute job. You'd have a hard time getting them away from me.
—Don Jaedike, North Freedom, Wisconsin

Loren Loucks says CLAW HITCH has already saved me enough time and trouble to pay for itself. You don't have to center or level the implement before you can get it on or off. I installed it on my 7000 Ford tractor. If someone stole my Claw Hitch, I'd buy another tomorrow. The more I use it, the more I like it.
—Loren Loucks, Elkhart, Indiana

CLAW HITCH

Owners agree: "Simplest way to hitch and unhitch heavy equipment."

What can we add to that? Claw-Hitch is standard or optional equipment on 12 makes of tractors in Europe. Over 50,000 sets are in use—thousands right here in the U.S. So far, not one dissatisfied customer.

Claws are rugged forged steel. Parts are chrome-plated. Category II & Category III inserts are hardened and chromed and they swivel giving you similar action as the ball attachments on your standard 3-point hitch. Adjustable spring spacer holds lower links at proper hitch-pin widths and is quickly adjustable

to change spacing if necessary. Guide-cones fit on open-end hitch pins for easy alignment and hitching. When hitching, all you have to do is come close, lift hydraulic-claws latch and lock automatically.

Claw-Hitch is the simplest to install and the most efficient method of hitching and unhitching, today. And it costs less than most rigid-frame-type quick couplers.

Is there any reason you shouldn't make your work easier?

Use this form for more information or to order Claw Hitch. We will ship direct. You will be billed by your implement dealer. Or, have your dealer order for you.
