

Farm Women Societies

(Continued from Page 46)
after the meeting by hostess Sara Ann Landis and co-hostess Gerry Buckwalter

York Co. Society 35

Joan Beck hosted York County Farm Women Society 35 on May 10. Members were informed of the following dates: County Picnic-July 26;

County Convention - November 2; and the Craft Fair, November 4.

Society 35 will entertain Society 25 on July 13 at a picnic.

Linda Brown, a member of the Loganville 4-H Club, presented a Oriental cooking demonstration.

The next meeting will be on June 8, at 7:30 p.m. at the home of Mrs. Judy Bren-neman.

Ida's Notebook

Ida Risser

This morning I got to feeling rather nostalgic; maybe it is because I had a birthday recently. I began to remember how things were when we first moved to this farm.

My husband had one cow, one heifer, two calves and also a truck and a tractor. He attended several Farmer's Markets and sold potatoes and vegetables that we grew. I had a job in Lancaster and a house to tend. But, the house had no running water, no heat (used two coal stoves) and no

bathroom for several years. It was a wonderful day when we piped water to the basement from the well down in the corner of the yard and an even better day when we installed plumbing.

In those days, I cleaned every room in the house every week. But as the years passed by and we had six children to upset the order of things, I felt that Saturday had to be clean-up day. Boy, were we all tired by night-fall. However, I really looked forward to coming downstairs, late at night after my bath, and seeing a clean house and hearing the quiet that resulted from having them all asleep in their beds.

As they leave home, I may decide that every other week is often enough to vacuum and scrub floors and polish. After all, with less feet to run through the house, there really is less dirt. No more rows of tiny shoes all polished and ready for Sunday School. No more toys all over the floor and sounds of children bickering as they play.

Now Allen milks some 50 cows in a six herring-bone milk parlor and keeps three tractors and a truck running almost perpetually. And, I have a new kitchen in a restored 1813-brick house.

Some things remain the same though -- the Conestoga still flows along within its banks (most of the time that is) and the sugar peas and strawberries bear each Spring and keep me busy.

Orienteering contest held

NEW HOLLAND -- distance between three separate flag markers. Finally, teaming up with a partner, they were given a detailed topographic map of a ridge overlooking Middle Creek marked with 10 control points.

It's been called everything from "running with a purpose" to "a cross between a treasure hunt and a cross-country race."

Whatever you call it, this sport, which has gained enormous popularity in Scandinavia, is fun and a real challenge.

Recently 26 Lancaster County FFA members found out first hand just how challenging it is when they competed in the Lancaster County FFA orienteering contest held at Middle Creek Wildlife Management Area, Kleinfeltersville.

The contestants were FFA members from three county chapters, and they competed on an individual basis as well as a two person team.

This year the contest was divided into three sections. First, a written exam tested the competitors' understanding of topographic maps and map symbols, their ability to take bearings, and their knowledge of the parts and function of a compass. Contestants then showed their skill in estimating distances by pacing off the

distance between three separate flag markers. Finally, teaming up with a partner, they were given a detailed topographic map of a ridge overlooking Middle Creek marked with 10 control points.

It was their task to locate as many of the points as possible using the map and compass and return to the finish line within the 45 minute time limit.

The individual winners from this year's contest were Reggie Bennet, Garden Spot High School, first place, and Jim Weidman, Pequea Valley High School, in second place.

The team taking first place was Garden Spot with Pequea Valley finishing in second, and Ephrata running third.

The contest, in its second year at the county level, was established to allow more participation in contests by FFA members who are not necessarily production oriented. The contest deals with a skill that would prove helpful in many types of conservation or in resource employment. It can also become a lifelong hobby that adds enjoyment to back-packing, hiking, fishing, hunting, camping, and other outdoor activities.

MEMO HAY, STRAW & EAR CORN SALE

No Use Tuning

A housewife called her television serviceman and claimed something was wrong with her color set. The repairman asked if there were any describable symptoms "The news is on now and the anchorman has a very long face," she said "Madam," replied the serviceman, "if you had to report what's going on these days you'd have a long face, too"

FUEL OIL HEAT

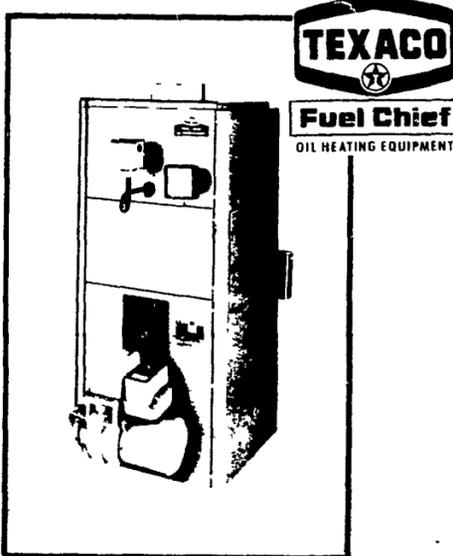

The modern design of the "FC-13" Series Texaco Fuel Chief Wet Base Boiler-Burner Unit features waterbacked heat-transfer surfaces on all sides and bottom to provide maximum heat absorption for greater fuel savings. Integrally cast fins staggered to increase the travel of hot gases in flue passages — prevent loss of otherwise wasted heat. Installation time is reduced to a minimum.

The entire unit is only 20" wide. Exterior is finished in attractive baked-on, decorator-approved colors. Features the dependable, economical Texaco Model TFR Fuel Chief High Speed Flame Retention Oil Burner with non-adjustable stainless steel firing head.

The "FC-13" Series Texaco Fuel Chief Wet Base Boiler-Burner Unit has been manufactured to furnish home-heating at its most comfortable-best!

FEATURES WHICH ASSURE RELIABILITY AND ECONOMY

- **FLUSH CABINET** — beautifully finished in green Hammertone Extension which completely encloses burner—optional
- **INSULATION** — Fiberglass blanket retains heat within boiler keeps jacket cool
- **WET BASE CONSTRUCTION** — bottom sides top and rear of fire chamber are completely surrounded by water backed cast iron sections to assure maximum absorption
- **COMBUSTION CHAMBER** — Ceramic fiber light weight one piece—molded unit is factory installed eliminates assembly of heavy fragile refractory materials
- **BUILT-IN WATER HEATER** — copper coil located at hottest point to assure ample hot water for household use the year round
- **HEAT FINS** — retard upward flow of hot gases for greater fuel economy

• **FUEL CHIEF HIGH PRESSURE OIL BURNER** — featuring the Texaco Fuel Chief High Speed Flame Retention design with non adjustable stainless steel firing head
