7000 pound super stock
 1. Mark Stauffer, full pull; 2. Marlin Brubaker, 293-1; 3. Tim Stauffer, 291-11.

Less coffee used by consumers

U.S. per capita food consumption dipped only slightly last year from the record high of 1976. Use of animal products remained virtually unchanged, while consumption of food from crops slipped 2 per cent as consumers drank 25 per cent less coffee in reaction to tight world supplies and

soaring prices. For 1978, economists see another slight decline in the overall food consumption index. Per capita use of food from crops may turn a bit higher, but not enough to offset a decline in the animal products category, led by reduced consumption of red meats.

The farmer meets his urban neighbor over a stone bridge on the Adams County Farmers Association float in the 4th of July parade sponsored by the Gettysburg Fire Company. The colorful float, assembled by Larry and Doris Wilkinson and John and Bonnie Hess, all of Get-

tysburg, emphasized the theme of "Building Bridges of Understanding." The children on the float were Josephine Hess and Eddie Wilkinson (farm side) and Jane Hess and Earl Wilkinson (urban side).

COME AND GET 'EM RED BARN COW MATS

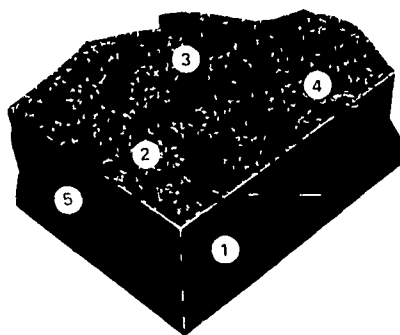

SAVE \$5 PER MAT BY PICKING THEM UP YOURSELF

Why and How RED BARN Rubber Mats can reduce costs, cut injuries.

RED BARN floors are 100% vulcanized rubber. They were first manufactured and installed in 1968, and have proven their worth to dairymen ever since. Whether these mats are used in free stalls or stanchion barns, their non-slip qualities provide both comfort and safety for your herd. Dairymen everywhere report bedding cost reductions of 80% and more, and a dramatic decrease in clean-up time. Slips and falls that result in swollen hocks and stepped-on teats are all but eliminated.

LABOUR COSTS CUT DRAMATICALLY

RED BARN rubber flooring cuts free stall cleaning time to a minimum. One dairyman with 165 stalls averages only 15 minutes per day to keep ALL stalls clean (testimonial on request). Because RED BARN mats are tough, depressions cannot develop that require filling, as is often the case with other types of flooring. Broken dividers causing animal injury are also avoided

NOTE THESE SPECIAL QUALITIES

1. RED BARN is the thickest mat there is, measuring over 3/4".
2. Surface has a grained, pebbled texture for easy cleaning and non-slip qualities.
3. Surface is resilient for comfort, yet springs back to original form.
4. TOUGH Each mat contains over 100 pounds of vulcanized rubber NO WIRE, METAL OR CLOTH BONDING MATERIALS ARE USED.
5. RED BARN is non-absorbent.

RED BARN Soft, Tough Mats Save Costs & Protect Animals.

RED BARN rubber mats come in four standard sizes and will fit virtually any floor installation. No adhesives are required. The corners of each mat are fastened with cement nails or Ram-Set pins and washers. The 100 pound weight of each mat does the rest. Mats are easily cut and fitted — the only tools needed are a piece of chalk, a square and a utility knife. To assure dry floors and good drainage, a slope of about 3 inches per 7 1/2 feet is recommended.

DETAILED INSTRUCTIONS FOR BOTH FREE STALL and STANCHION BARN INSTALLATIONS are AVAILABLE on REQUEST
