

YOUR BEST BET... FEED IT WET!

energy saver.

When we say "energy saver," we're talking about two kinds. . . the kind you use, and the kind your dryer uses. With Harvestore® limited-oxygen storage, there's no need to dry your grain at all, if you plan to feed it. Numerous studies have shown that high moisture grain makes excellent livestock feed and is highly palatable.

By storing grain at high moisture content you've not only saved the costs and effort of putting it through a dryer, but you have the start of a completely automated feeding system. That can really save you a lot of time and energy.

Best of all, a Harvestore automated feeding system is not only an excellent investment, but one that pays for itself - with interest - usually in five years or less. Why not get in touch and get all the details.

Look at Harvestore® this year.

JOSEPH R. VOGEL, Chester Springs, Pa. 215-827-7077

SERVING CHESTER COUNTY, PA., NEW CASTLE COUNTY, DEL.

Your Penn-Jersey HARVESTORE® Representative is Professionally trained, well experienced and dedicated to agriculture. He is qualified to prepare a personal profit plan to help you build your Harvestore® System step by step.
