"Test Cow is Purina's Super Energy, Super Value Milking Ration"...

Dr. J. P. Everett
Purina's Director
of Dairy Research

"There are lots of so-called 'high energy' milking rations around that claim to have a high energy, high TDN content and at a low cost," says Dr. Everett. "The real measurement of a milking ration's value is the income it produces over feed cost, not the price."

"At the Purina Dairy Research Center, we are proud of Purina Test Cow . . . proud that it is available for America's dairymen. It is truly a "super" high energy ration. In fact, it contains the highest energy and lowest fiber of all Purina milking rations."

"I don't know of any milking ration I would recommend more highly."

Certainly all milking rations are not alike. So don't settle for less than the best. Ask us about Test Cow today.
