

Lebanon County DHIA Monthly Report

JULY 1978

A cow which goes by the name of AC, owned by Harvey Bomgardner, is the milk production champion for Lebanon County's DHIA program last month. Beginning her lactation at age 5, she pumped out 25,913 pounds of milk with a 3.1 per cent test and 794 pounds of butterfat. Willow Maple Farms' Celly took the butterfat crown with her production credits of 22,748 pounds of milk, a 3.9 per cent test and 894 pounds of butterfat. She is a 4-year old.

FREY FREE STALL

LIFETIME FREE STALL HOUSING

Cut bedding costs 75 per cent, reduce labor for barn cleaning and cow washing; reduce teat and udder injury to the minimum — house your milking herd in free stall housing. Each cow provided a stall for loafing. She won't be stepped on, the rear curb forces manure out into alley for mechanical cleaning or washing. A few minutes twice a day cleans the stalls and curbs, bedding lasts almost forever if your stalls fit the cows. Popular sizes are 6'6", 7' and 7'6" Size 'em by breed

Our free stall partition may be mounted on wooden head boards or we make a steel divider. Set the legs in 8 to 10' concrete curbs to hold and retain bedding. Stall floor can be soil, sand or gravel. Bedding — straw, sawdust, peanut hulls, ground corn cobs, etc. Should be installed with paved alley surface 8 feet wide for mechanical cleaning or washing

- 8 Models all steel welded farm & feedlot gates
- 2 Models all steel welded head catch gate

For prices, contact Fred Frey, Mgr.

STOLTZFUS WOODWORK
RD2 Gap, PA. Box 183
1 Mile North Rt. 897 From Gap

Grind rations fast, blend 'em uniformly with grinder/mixers built for tractors over 100 hp

100 hp? Try 155 hp—that's the kind of capacity you'll find in the John Deere 700 and 750 Grinder/Mixers. It reflects the truly big-job machines in the field. Uniform mixing, capacity to spare, long life—in grinder/mixers that's John Deere

Efficient ear corn harvest is easy with a John Deere 300 Husker

Pick and husk up to three narrow rows of 150-bushel corn at 3.5 mph with this 300 Husker. An exclusive air system blasts 5800 cfm to loosen husks and clear trash. When husking's over the 2-row (wide or narrow) and 3-row (narrow) corn heads can mount on certain combines and forage harvesters

Maximize your crop savings on slopes to 18 percent with a John Deere SideHill Combine

On the go, automatic separator leveling from feeder house through cleaning shoe is yours with a SideHill 6600 Combine. As the separator levels on slopes to 18 percent, the header pivots to parallel the ground. Keeping the separator level maximizes your crop savings because no material drifts to the downhill side as with a conventional combine. And to master hilly fields, you get a 128 hp 404 cubic inch diesel engine. The cylinder is 44 inches wide. Matched headers include 4- and 6-row corn heads and row-crop heads. Platforms with rigid cutterbar in sizes from 13 to 22 feet with flexible cutterbar in sizes from 13 to 22 feet. See us for details.
