

Federal milk order 4 amended, pooling requirement suspended

ALEXANDRIA, Va. — order have approved the Dairy farmers operating amendment of their under the Middle Atlantic program. The amendment federal milk marketing order, which goes into effect

Oct. 1, will continue the current method of pricing Class I — or fluid-use — milk under the program but will change some pooling and diversion provisions.

More than 87 per cent of farmers represented in a U.S. Department of Agriculture (USDA) poll of dairy cooperatives approved the amended order, according to Herbert L. Forest, dairy official with USDA's Agricultural Marketing Service.

The present method of pricing Class I milk under the order, Forest said, is a basic formula, plus a \$2.78 Class I differential. The Minnesota-Wisconsin price serves as the basic formula under the Middle Atlantic order.

Changes in the milk order would relax provisions for pooling a distributing plant and for diverting producers' milk to nonpool plants when it is not needed for fluid use at a distributing plant. Still

another change would allow operators of partially regulated plants to increase Class I sales in the Middle Atlantic order area to a limited extent without becoming fully regulated under the order.

Also, a milk pooling requirement under the Middle Atlantic federal milk marketing order will be suspended for September and October.

Forest said the action suspends the requirement that a distributing plant sell at least 50 per cent of its milk

for fluid use before it is eligible to have all its milk pooled and priced under the order. The suspension has been in effect since April.

The suspension was requested by Michaels Dairies, Inc., and Lehigh Valley Cooperative Farmers. They told USDA that a continuing downward trend in Class I — or fluid-use — milk sales means that some plants will not be able to meet the 50 per cent pooling requirement. As a result, some dairy farmers' milk would not be priced and pooled under the order.

CCC purchased no butter, cheese

WASHINGTON, D.C. — The Commodity Credit Corporation contracted in August to buy 14.7 million pounds of nonfat dry milk but no butter nor cheese, the USDA reported this week. The purchases were made under the dairy support program. During the month six million pounds of butter and 2.2 million pounds of cheese were sold for unrestricted use. As of Aug. 31, CCC had uncommitted inventories (in stock or under contract) of 216.1 million pounds of butter, 40

million pounds of cheese, and 598.9 million pounds of nonfat dry milk. Dairy products bought by the gov't are used mostly for domestic and foreign donations, but they are also available for sale at 110 per cent of current purchase prices.
