

**Flaherty,
Thornburgh
to speak**

HARRISBURG - Peter Flaherty and Richard L. Thornburgh, the Democratic and Republican candidates for governor, have tentatively accepted invitations to speak at the 106th annual convention of the Pennsylvania State Grange in Butler, Pa. October 23-26.

J. Luther Snyder, State Grange Master, said that the two candidates were invited to express their views to the delegates and Grange members who will attend the convention.

Snyder, who heads the 50,000-member State Grange, said "we feel it is particularly important at this time to hear the opinions and proposals of both candidates for the office of chief executive of Pennsylvania."

This is the third time that gubernatorial candidates of the major parties have been invited to speak at a State Grange convention.

In 1973, Milton J. Shapp and Drew Lewis addressed the State Grange Convention in Washington, Pa., and in 1962, William W. Scranton and Richardson Dillworth spoke in Reading.

Patz dealers complete training

Pictured above are participants at the Morris Miller sales training seminar given at Crossgates Inn, Mechanicsburg, for Patz dealers from Pennsylvania, Maryland, Ohio and New York. Dealers received training geared to professionalize their sales efforts.

"THE DIESEL WITH A DIFFERENCE"

Cuts your power costs because it's way ahead of its time on all points.

AVCO-VM diesel engines are world-proven money-savers. They deliver maximum power efficiency immediately. Under any sudden load or climate variation. Their higher power to weight ratios mean NO REDUCTION IN HORSEPOWER to qualify for pollution standards.

They're stingy on fuel, too. Many users report fuel consumption CUT IN HALF — and more — compared with gasoline engines. In some installations, our diesels are delivering more than

TWICE the hours of operation per gallon of fuel.

Faultless performance is the norm, rather than the exception. A choice of 27 premium quality air-cooled Avco-VM's (5 to 670-hp) means there's one that's right for your application.

Modular, unitized construction means fewer specialized parts, lower weight per hp, lower maintenance costs, 70% parts interchangeability — and they'll fit the tightest space.
