Dealer In
Lancaster County.

Give Her the **CHORE-BOY** SSP Treatment

division of cego, inc.

Everything from Let-Down to Ship-Out

There are a lot of ways to coddle a cow but most of them are added up in the Chore-Boy SSP idea. Chore-Boy builds every milking system in prominent use today: stanchion, herringbone, polygon and the world's most popular rotary turnstyle. And replacement parts take priority - even over production items. It all adds up to Systems - Service - Parts ... the Chore-Boy SSP treatment.

1 Steel Clad Look-in Claw
Rugged stainless steel protected Look-in claw offers total visibility, fast milk removal, minimum agitation. Alternate or simultaneous pulsation. Cleans in place fits any system.

2 High Capacity Pulsator
Industry's most reliable high capacity pulsator provides quiet, dependable, positive action. Rated 10,000 hrs. service at full load. No expensive converters, solenoids or magnets required. Fits any system.

3 High Capacity Receiver
Eliminate all unsanitary floats and probes. Micro-switch activates pump by milk weight alone. High capacity group handles over 20 units. Automatic moisture trap and pump cavity drain. Totally enclosed, thermal overload protected motor. Other top features.

4 Glass or Stainless Steel Pipeline
Chore-Boy offers both stainless steel and glass pipeline in 1 1/2" and 2" in glass and 1 1/2", 2", 2 1/2" and 3" in stainless steel. Quick service on replacement parts.

5 Vacuum Suppliers
Available in 1 H.P. through 10 H.P., all vacuum suppliers have fully enclosed, heavy duty, capacitor start, thermal overload protected motors. Include anti-back spin valves. Single source, easily adjusted, constant feed oil supply provides sight check of oil level. Rugged, dependable, durable.

6 In-place Unit Washer
Simply invert claw in washer cups and let them come clean in the regular automatic washing cycle. Washer is self draining, folds into cover to protect system from dust and dirt. Saves time, trouble and cleans unit better.

7 Automatic Take-offs
Chore-Boy's air actuated automatic take-off units are more dependable than most, feature an extra wide passage through the flow sensor to help prevent plugging and consequent over-milking. Adapts to all brands of milkers, parlors and pipeline systems. Adjusts claws to every type udder. Many other features.

8 Complete Feed Handling Systems
Chore-Boy manufactures virtually every prominent feed handling system for the milking parlor. You may distribute feed from central storage - dispense by electric time controlled or pull cable rotary feeders. Many customizing options.

9 Every Proven Cow Handling System
Chore-Boy builds individualized installations for short or long stanchion rows, around-the-barn herringbone, polygon or the world's most often selected rotary - the turnstyle system. Experienced, professional, unbiased assistance for all herd sizes.

10 Kwik Kool Bulk Tanks
The most effective and efficient refrigeration system available in bulk milk tanks today. Features include pressure-formed urethane foam insulation, end-mounted controls, dial-omatic washer, interchangeable lids and seals, round double wall construction. Space saving thru-the-wall or regular installation.

11 All Electric Automatic Washer
Turn a knob and wash the system better while saving at least one-half hour per day in valuable time. Rinse, long wash, mixing detergents and final rinse are all automatic. Timer is fully adjustable. Can be adapted to any length pipeline system. Options.

12 Power Gates and Manger Guards
Get faster cow movement through power gates and power manger guards. Groups leave without stopping for feed in the mangers. Manger guards close slowly and gently, in timed sequence with outlet gate to help move cows out. Pit area controls.
