

Davis, Romesberg win Quarter Horses

Robert L. Stein, 14, Washington R5, and Joan Romesberg, 13, of Rockwood R2, were each awarded a yearling Quarter Horse from Bob Evans Farms, of Ohio, during the State 4-H Horse Show, in Harrisburg.

winners were selected in recognition of outstanding work and leadership displayed within 4-H, at school, and other activities. They are two of 9,500 youths who take part in 4-H Horse Club activities.

sausagemaker Bob Evans, "providing good quality colts to 4-H members who show outstanding leadership qualities is our way of expressing appreciation of the fine work of the 4-H program."

Evans, raised on a farm, has supported the efforts of young people interested in agriculture and currently serves as a trustee of the Ohio 4-H Foundation.

"Nominations for the award were screened by each 4-H Horse District Committee," said James P. Gallagher, Extension animal scientist at The Pennsylvania State University. Winners were determined by a committee consisting of Penn State College of Agriculture faculty and staff members.

Robert, the son of Mr. and Mrs. Jerry Stein, has been a 4-H member for five years. He currently serves as president and news reporter of his 4-H horse club.

His 4-H horse project the past four years has been a 54½-inch mare pony. In each of these years, Robert qualified for the District 4-H Horse Show.

"My main reason for wanting this Quarter Horse yearling is the desire to own and train a young horse. I am also outgrowing my pony," he points out.

In 4-H work, Robert takes part in county horse judging team activities, local horse shows, and fund raising campaigns. As an extra project, he works with young members, teaching riding skills.

He is a member of the Upper Buffalo Presbyterian Church where he sang in the choir.

In school, Robert participated in basketball and junior olympic competition. He currently is an elected member of the Trinity High School Student Council.

Joan is the daughter of Mr. and Mrs. Jack Romesberg, and has been a 4-H member for four years. She currently serves as president of her club.

For her first project, she owned a Shetland Pony which she soon outgrew. Later she used her brother's western pony, then purchased a registered Quarter Horse gelding. Last Christmas she received a 10-year-old registered Quarter Horse.

"This opportunity to win a

young Quarter Horse is very important to me because I've always had the desire to raise a foal and work with it," she points out. "Since my mare is 10 years old, I will need a better horse in the near future."

In 4-H work, Joan is a member of the horse judging team and participated in the 4-H poster contest and demonstration day. In addition to horse project work, she took indoor gardening and clothing.

She encouraged numerous boys and girls to join 4-H Clubs, and this past winter, helped to organize a program to involve club members in sewing riding outfits and other horse articles.

Joan is a member of the

United Church of Christ where she served as an acolyte for three years.

In 1976, she received the Science Fair grand prize at the Rockwood Elementary School.

She is a junior high school majorette and is a member of both the junior band chorus. She has been a recipient of several scholastic awards.

Save Energy and get **FREE HOT WATER...** with the revolutionary... **MUELLER FRE-HEATER™**

The HEART of the Fre Heater™ the unique all stainless steel heat exchanger!

HOT WATER OUT APPROX. 140°F

*PATENTED U.S. PATENT NO. 4,841,728 AND OTHER PATENTS PENDING

MUELLER FRE-HEATER™

ALL STAINLESS STEEL CONSTRUCTION! Mueller Fre-Heater heat exchangers are constructed entirely of type 304 stainless steel. The heat exchanger in both models utilize Mueller Temp-Plate, a patented heat transfer surface that is in use in more than 60,000 Mueller Milk Coolers around the world.

CHOOSE FROM SEVERAL SIZES AND MODELS! Mueller Fre-Heaters are available in 2, 3 and 4 HP sizes for either HiPerForm or conventional refrigeration systems.

A 2 or 3 HP installation normally requires one 120 U.S. gallon water storage tank. 4 HP installations may require two 120 gallon water storage tanks.

Mueller Fre-Heaters, Model 'B' and Model 'C' can be used with either Mueller Milk Coolers or with milk coolers made by other manufacturers.

FREE HOT WATER! There are many variables that determine how much hot water can be generated however a rule of thumb is that a Fre-heater operating on 60 degrees F well water will produce a volume of 140 degree F water similar to the amount of milk produced during a milking in other words, if 100 gallons of milk per milking is produced, approximately 100 gallons of hot water (140 degrees F) will be generated during each milking. Experience has shown that on most dairy farms enough hot water is produced to satisfy all hot water requirements.

The Mueller Fre-Heater comes to you from the maker of world famous Mueller Milk Coolers!

MUELLER Milk Coolers®

MUELLER Bulk Milk Coolers®

SAFEGUARD YOUR LIQUID INCOME WITH A MUELLER

Space saving Mueller Bulkhead Coolers are installed through a milk house wall so you can buy a cooler to accommodate the production needs of your growing herd, regardless of the size of your milk house. Mueller Temp-Plate® Heat Transfer Surface provides efficient, dependable cooling. Large radius corners and smooth welds team with durable stainless steel construction for complete and easy cleaning. All Mueller cooler models readily accept Mueller-Matic® Automatic Washing System.

Now, let herd size determine your cooler capacity, not milk house space limitations. Depend on MUELLER.
