# Ⓞ Livestock & Grain Bodies

Bigger Than Ever, Better Than Ever

Precision engineered roll formed 52" high steel sides provide greater capacity at less cost.

We've built rugged truck bodies for over 50 years and today we're continuing that tradition. That's the reason you can't make a better investment than an Omaha Standard steel or hardwood farm body.

- One-piece roll formed steel sides with built in tarp rail. Available in 28", 40" and 52" extra-capacity heights all with maximum corrugation for maximum strength.
- 40" and 48" hardwood sides also available. The truck body Omaha Standard built its reputation on.
- The toughest platform in the business—laminated wood, smooth steel or tread plate.
- Easy-conversion hardwood upper racks greater flex and life than steel fold down racks.
- A full line of rugged gates all engineered to make your job easier.

## Omaha Standard Hoists

■ Seven precision-engineered scissor hoists from 4 to 34 tons for bodies 8' to 24' 'Olympic Series' twin telescopic hoists with greater torsional stability for bodies 16' to 26' and 15 to 43 ton capacity.

Omaha Standard bodies and hoists time-tested on thousands of farms throughout the United States and Canada.

Look to Omaha Standard for the best. Our equipment takes all the punishment you can dish out and comes back for more, year after year. We stake our reputation on it.

We've been a part of successful farming and ranching for over 50 years.

## The satisfaction that comes from doing a good job of farming

It's a great feeling to know that you are the master of your farmlands... that when you treat your soil right, it will treat you right. Liming is one of the most important factors in keeping your soil in the highest productive range. A good pasture with a pH of 6.5 or higher, for example, will make 300 to 400 lbs. of beef per acre and produce up to \$100 gross income per acre. This means with the help of lime, profits from pastures can compare favorably with feed or grain crops.
