Maximize your crop savings on slopes to 18 percent with a John Deere SideHill Combine

On-the-go, automatic separator leveling from feeder house through cleaning shoe is yours with a SideHill 6600 Combine. As the separator levels on slopes to 18 percent, the header pivots to parallel the ground. Keeping the separator level maximizes your crop savings because no material drifts to the downhill side as with a conventional combine. And to master hilly fields, you get a 128 hp 404 cubic inch diesel engine. The cylinder is 44 inches wide.

Matched headers include 4- and 6-row corn heads and row-crop heads. Platforms with rigid cutterbar in sizes from 13 to 22 feet ... with flexible cutterbar in sizes from 13 to 22 feet.
