HOLIDAY STAIN REMOVAL TIPS

In the excitement of the holidays there's bound to be a spilled liquid or a dripping candle that can cause a spot or stain. So plan now to buy a few basic items to help with stain removal emergencies. You will need paper towels, cleaning fluids, a sponge, oxygen bleach, chlorine bleach, petroleum jelly and an enzyme pre-soak.

The key to stain removal is immediate treatment. When company is present and a spill occurrs use paper towels to absorb as much of liquid as possible. Soak a sponge in cool water and use it to remove further traces of the spill. Later, you can get down to the business of final stain removal.

Test any stain remover on a corner of fabric first to see how it reacts. Treat spots from the back of the fabric. Place the spot downward on some paper towels so that the stain will come off the fabric instead of going through it. After treatment, regular laundering will usually remove the last traces of the stain.

Here are some special methods for treating the most common holiday-type stains.

Sponge fruit stains, including cranberries, immediately with cool water. Later soak in warm water and enzyme pre-soak. Then launder. If possible, launder again using chlorine bleach.

For gravy or milk stains, work a paste of detergent and water into the stain. If a greasy stain remains after laundering, sponge with a dry-cleaning solvent. Soak coffee or tea stains in warm water and an enzyme presoak or oxygen bleach and launder.

For candle wax spots, scrape off as much wax as possible. Then place the stain between layers of paper towels and press with a warm iron. Next, place the stain face downward on paper towels and sponge the back with drycleaning solvent. Launder when dry.

For lipstick spots, rub undiluted liquid detergent into the stain until outline of stain is removed. If after laundering, stain remains, sponge with drycleaning solvent.

ANTI-FREEZE FASHIONS FOR LEGS

Well dressed legs war be layered for warmth and fashion this season. Warmups go from tights to anklets plus knee-highs, over-the-knee styles, thigh-highs and leggings.

Feet are treated to fashionable comfort with eye-catching slipper socks and warm-up boots. See them in quilts, bulky knits and acrylic pile linings. For example, there's a pile-lined boot with nylon-quilted upper and vinyl bottom that's completely washable.

Texture and pattern are keynotes with flat knits, ribs, bulkies, cables, open weave pointelles, and diamond cuts heading the list Colorful tweeds, argyles, glitters, stripes, sweater patterns,

air to flow around it; this kept away mold.

From simple, square cribs of alternately piled logs, covered by a sloping roof, the corncrib evolved to the drive-in crib. The sidewalls always slanted outward at the eaves. On a great many mountain farms this was the beginning of barn architecture, for by adding doors in the driveway wall, you have the simplest American barn.

Today, a much more efficient structure for the

Today, a much more efficient structure for the storage of corn — along with large farm implement storage — is provided by the imaginative use of the Laminated Rafter. The exceptional strength of this aesthetically pleasing arch may be readily combined with simple construction, requiring a minimum amount of materials and erection time. It is a structure that permits great flexibility, because all inside space is useable, offering so many possibilities for a variety of farming needs.
