

Help Yourself And Our Nation's Agriculture

New facts are needed about acres of farmland, numbers of cattle, tons of fertilizer, bushels of corn, and many other subjects. They are of vital importance to decision makers—on farms, in industry and in government.

The U.S. Bureau of the Census relies on your cooperation to take the 1978 Census of Agriculture. It will provide new benchmark data showing the trends of America's farms and ranches.

Data for 1978 are requested as early in 1979 as possible. Your cooperation will improve the speed and accuracy with which new totals are available for your use and for the organizations that serve you.

WHAT'S NEW

GESTATION STALL

Star Agri Products has introduced a new Agstar Gestration Stall, according to Floyd Carter, marketing manager.

The new Gestration Stall, Agstar Model GS-100, is designed to help prevent pregnant sows from fighting and the tension that goes with it. It also is designed to provide better feed regulation and there fore better weight control and better feed regulation and

therefore better weight control and better litter size that this brings. "Improved labor efficiency and overall sow management, including ease of flushing and vaccinating, are other by-products offered by a high-quality, well-designed gestation stall such as the new Agstar model," said Carter. The new GS-100 is made so that the sow can be loaded from the rear of the stall and unloaded from the front, for ease of use.

Gestation stalls are usually placed in rows. Thus, each GS-100 stall comes with one side assembly, and the next stall forms the other side.

Available is a full line of stall accessories, including a new design sow feeder, the Model FS-705. The new

feeder comes with feed flow adjustment. The FS-705 Feeder can also be used in a variety of sow feeding situations, according to Carter. This same feeder is now being used in the Agstar farrowing stall, Carter said.

The new Agstar Gestration Stall accessories include an available bracket to mount a nipple waterer in the stall.

For more information, contact Star Agri Products, P.O. Box 115, Goshen, Ind. 46526.

Some cicadas live underground for 17 years, then emerge for a few weeks of sunshine before dying.
