**INCLUDES:**

- Roof Ladder
- Outside Ladder
- Inside Ladder
- Safety Ring
- Large Fill Hole
- Manhole
- 2-ring Door
- Base Angle
- Bolts & Nuts
- Caulking
- Hardware

All Sizes  
up to 152,000 Bu.

**GRAIN STORAGE SYSTEM, only 28¢ per bu.\***

Includes complete bin, aeration fan, transition, channel-lok sub floor panels, humidistat w/cord and thermometer, unloading auger w/center well and intermediate well, totally enclosed motor w/drive kit and guard, control rods and freight  
Eight Year LEASING PROGRAM only 7¢ per bu. per yr \*  
\*Based on 48x9 ring bin.

**LOW TEMPERATURE DRYING SYSTEM, only 48¢ per bu.\***

Includes bin, channel-lok floor, fan, heater, and temperature control panel which maintains plenum temperature from 7 to 10 degrees above outside temperature, or can be set to stop the heaters in good drying weather and back on if humidity is too high or temperature is too low. Freight included to our warehouse  
Eight Year LEASING PROGRAM only 10¼¢ per bu. per yr \*

### FLOW-MOOR CONTINUOUS FLOW DRYING SYSTEM

w/ **NEW** Electronic Moisture Control and Solar Heating Equipment

The Most Economical Fast  
Drying System  
Up To 50% Fuel Savings

**ONLY \$3865** For Flow Moore Unit  
w/7½ HP motor electric panel & moisture control for  
36 ft. bin

**HOW IT WORKS:** Wet grain may be deposited into the top of the drying bin as fast as you harvest. As soon as the bottom layer of grain is dry enough the two tapered sweep augers draw it to the center of the bin where it's picked up by the 8" vertical auger. On a single bin operation the dry grain is respread on top by the recirculation spreader. With two bins grain can be transferred to the second bin with up to 22% moisture where it's cooled and dried down to the desired level. The electronic moisture sensor mounted on the side of the vertical auger monitors the grain. When the grain moisture exceeds the knob setting on the control panel the augers are stopped until the grain is dry enough. The system operates automatically 24 hours a day without babysitting.

#### FEATURES

- Up to 50% Fuel Savings (no heat loss) Heat is absorbed as it passes up through the wet grain at the same time grain is preheated as it moves down to the final drying area
- New Electronic Moisture Control - assures an accurate dry grain moisture level regardless of extreme harvesting variations (not affected by temperature)
- Two Taper Sweep Augers - assures positive movement and blends grain (no stalling)
- 8" Vertical Auger - increased capacity
- Less Moving Parts - only one gear box (not two) less maintenance

**WANTED - DEALERS & SALESMEN IN SOME AREAS OF:**  
N.Y., Pa., N.J., Del., Md., Va., & W. Va.

Financing arranged through ASCS, Production Credit, leasing companies or your local bank  
Call or write for quotation on complete grain handling, drying and storage system, feed grinding, mixing and processing systems, bulk tank metering, weighing and handling equipment
