## NORTHCO Slant-Back Cage Laying System

### IT'S A TOTAL SYSTEM

Combine the Slant Back System with NORTHCO Cage Feeding, Ventilation, Egg Gathering and Manure Handling Systems and you have a total system engineered to provide efficiency and dependable performance.

### HIGH DENSITY... LOW PROFILE

Northco's Slant-Back System is the simple way to increase profits by cutting building costs and increasing bird densities

HIGH DENSITY - Using Northco's 18-inch (45.7 cm.) deep cages, forty thousand birds easily fit into a 40-foot (12.2 m.) wide house with a 420-foot (123 m.) long cage row. Systems with 16-inch (40.6 cm.) deep cages are even more compact. Either way the total height of the cage row is only 75-inches (191 cm.).

NO DROPPING BOARDS OR DROPPING BOARD SCRAPERS - Vinyl dropping shields on the slanted cage backs deflect manure into the pit. Manure on the shields dries and flakes off into the pit without build-up.

WELL VENTILATED - Northco's Roof Exhaust Ventilation System provides every bird on every deck the fresh air needed to minimize stress and increase production.
