Open House

(Continued from Page 34)

been pegged at around 8600. The young pigs will be weaned at three weeks of age and leave the premises at eight weeks.

- The first boars and gilts are to arrive here as early as Feb. 19. They're being supplied by The Pig Improvement Company, the world's largest supplier of gilts and boars.

When the new center is in full-operation, two managers will work closely with two

students at a time for twoweek periods. It is envisioned that students will be able to pick up considerable practical knowledge in swine handling and management, including reproduction, feeding, farrowing, and disease control - both preventive and surgical. Presently some farmers opinionize that some veterinarians are not as fully trained for swine work as what they'd like. That might seen change.

"The training plan has been tested and worked very well," commented Baile in an interview last Fall.

A corporation, the new facility is to be known simply as PPAB Limited. There are ten shares of stock, with six farmers having one each, shares each. Each share of feeder pigs every five weeks.

Construction is being handled by Sand Livestock Systems, Inc., of Columbus,

and two others having two stock will get half of the

Meat packer

to stop

violation

NEW YORK, N.Y. - R&D Investments, Inc., a Fleetville, Pa., firm doing business as Edwards Bros. Packing Co., has been ordered by the U.S. Department of Agriculture to stop violating the bond requirements of the Packers and Stockyards Act.

The corporation, which formerly bought livestock for slaughter in New York, Maryland, Pennsylvania, New Jersey, * Ohio, and Virginia, filed for bankruptcy and is not operating now.

The firm consented to the order and waived oral hearing, without admitting or denying the charge in an administrative complaint filed by the department.

Administrative Law Judge Dorothea A. Baker ordered the firm to cease and desist from engaging in business as a packer without providing a bond or its equivalent.

The case and desist order, like a permanent injunction, was issued to insure the firm's future compliance with the P&S Act.

The nursery house of the feeder pig unit at New Bolton Center is in its initial phases of construction. In the background is the manure filtration area and Slurrystore.

FARROWING EQUIP

Farmer Boy Farrowing Stalls are built around this crate with basic high-strength construction - employing structural steel tubing, angle iron and 14 ga. steel panels, protectively

END ARCHES of 2x2-inch angle iron provide a firm support for fastening crates

TWO TOP SOW GUARDS of 2-inch steel tubing.

HORIZONTAL SIDEWALL BARS are 2inches and vertical bars are 5/8-inch steel

SIDEWALLS ARE ADJUSTABLE vertically and laterally to accomm small sow and prevent problems with the sow twisting

BOLT ADJUSTMENTS provide three vertical adjustments as well as inside measurements of 22, 23 and 24 inches, allowing user to turn in either one of the side panels or both.

THINKING HOGS? REMODELING OR BUILDING?

THINK FARMER BOY FOR A COMPLETE SYSTEM WE SPECIALIZE IN SWINE SYSTEMS - FARROWING, NURSERY, FATTENING - OPEN FRONT OR CONTROLLED ENVIRONMENT. **FEATURING:**

- · Ultimate in ventilation by Chore Time
- · Farrowing stalls, gestation stalls, fencing, caged nurseries - all designed and built by Farmer Boy for long life, heavy duty, excellent workmanship
- Flooring Plastisol coated wire mesh for the ultimate; Tender Care galvanized woven wire flooring; also concrete slats
- Feeders Smidley, Shenandoah
- Feed Bins & Flex Augers by Chore Time
- · Farmer Boy Control System For curtain or louver, automatic control on thermostat
- Stanfield Heating Pads
- Arato Water Nipples
- Modular type farrowing and nursery
- Hog Shelters portable fattening, 40 to 70 head units
