Only Banvel[®] herbicide offers so many ways to control weeds.

You can use Banvel herbicide at more different times in the corn production cycle than many other herbicides

Pre-emergence Tank-mixed with "Lasso" to control both grasses and broadleaf weeds

Early layby In corn up to 5 inches Banvel as an overlay at a one pint rate gets early and late weeds

Post-emergence. In corn up to 36 inches Banvel gets rid of many tough-to-kill weeds that 2-4-D misses and of course the easy weeds too

****Fall treatment** Air application knocks down hemp dogbane permitting easier harvest

Tough-to-get weeds. On the Banvel label note the stubborn species that Banvel controls

Rescue When weeds threaten a takeover (you couldn't get into the field earlier), Banvel can help save your crop
