# Neseth

## the Original Piston Pump for Controlled Manure Storage.

Whether you choose to handle manure as a semi-solid or liquid, Neseth has the pump and the experience to design a manure management system best suited to your requirements. More farmers have installed the Neseth system than any other — and for good reasons. The Piston Pump was originated and developed by Neseth. We have three models available to meet different needs and it's easy to install in new or existing setups. The Neseth Piston Pump is built for dependability and trouble-free service, and best of all, is far more economical than hydraulic systems or air tanks. Remember — no one has more experience or more installations than Neseth, the originators of the Piston Pump.

MANURE IS PUMPED UNDERGROUND THROUGH A 12" PVC PIPE TO STORAGE

EASILY INSTALLED IN NEW OR EXISTING

- FREE STALL BARN
- REGULAR STALL BARN
- OPEN LOT OPERATIONS
