

# NEW GEHL MOWER CONDITIONERS - Better Than A Haybine

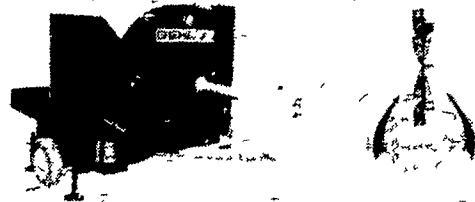

- ★ Full Floating Machine
- ★ Heavy Duty Rock Guards

- 3½" reel tine spacing: Instead of conventional 4½" tine spacing, Gehl reel tines are 3½" apart. They sweep the cutterbar clean twice every revolution, eliminating build-up and hair-pinning
- 'Leaf-saver' rolls: Gehl mower conditioners use conditioning rollers, not crimping rollers. The upper steel and lower rubber rollers are set close, but never touch, to gently crack the crop stem, speeding drying, but minimizing valuable leaf loss. Upper roll is set ahead of lower roll to act as secondary reel. The result to you is fast drying, high protein hay

□ In Stock: 9 ft. and 7 ft. models.

## HAVING PROBLEMS BLOWING HAYLAGE? TRY THE GEHL SUPER BLOWER - TWO BLOWERS IN ONE!

No more waiting in the field for the box to come back. The 99 ends silo bottlenecks. It matches the round trip speed of your best storage box. Most self-unloaders won't unload fast enough for it.

When compared to conventional blowers, the FB99's twelve staggered fan blades, six on each side of the rotor, actually give you two blowers in one. The timed delivery of material from the alternate paddles provides maximum use of available space in the nine inch pipe. Result is increased capacity without increasing pipe size. Alternate paddles provide a steadier flow of air and material. Pressure and velocity is maintained as material is blasted up the pipe. No gaps. No slowdowns.

IN STOCK: GLENCOE FIELD CULTIVATORS

GET READY FOR THE HAYLAGE SEASON WITH A GEHL CHOPPER.
