## Blair Co. man named to ag post

HARRISBURG — John M. Drake, 51, of Curryville, Blair County, has been appointed Regional Director for the Pennsylvania Department of Agriculture's Region Five Office, according to Agriculture Secretary Penrose Hallowell. Drake assumed his new duties with the Department on May 9.

As Regional Director, Drake will be responsible for the day to day operations of the regional office, which is located in Altoona. In addition, Drake will supervise the work of the field staff who operate out of the office.

Hallowell said he was pleased that Drake has accepted the appointment.

Drake has an extensive background in agriculture and governmental affairs as a major factor in his selection for the position. "John Drake has had a great deal of experience in agriculture and in the farm problems of southwest central Pennsylvania," he said. "He has repeatedly proved his capabilities through work in agricultural organizations as well as a variety of governmental associations. I am confident that John will become a major force in our efforts to make the Department's Region Five Office more responsive to the needs of farmers and consumers in the area."

Drake and his wife, the former Jean M. Quarry, own and operate Cove Knoll Farms in Curryville, in partnership with their two youngest sons. The farm consists of 220 acres, where the Drake's maintain a herd of 150 cattle, including 85 Holstein milk cows.

Drake is a member of the State and National Holstein Associations, the North Woodbury Grange, where he is a past Pomona Master, the State and National Grange and the Pennsylvania Farmers Association, where he served as Blair County Director. He is the immediate past president of the Pennsylvania Association of Township Supervisors. Elected North Woodbury Township Supervisor for the past 18 years, Drake served as secretary of that board for 16 years. He served two years as president of the Blair County Association of

Township Officials, as well as serving as chairman of the Blair County Planning Commission.

Active in community associations, he is a member and a past president of the Martinsburg Booster Association, a member of the Martinsburg Rotary Club, and a member of various county and local Republican clubs. Drake is also a member of several Masonic bodies and the Jaffa Shrine.

Drake was educated in the North Woodbury Township School and Martinsburg Borough School. He is a member of the First Brethren Church in Martinsburg.

The Drake's have six children, all married. Drake has lived on a family farm his entire life. Raised on his parents' farms, he and his wife started farming for themselves in 1948.

### Kutztown FFA elect officers

The Kutztown FFA Chapter elected new officers for the 1979-80 school year. They are as follows: President, Keith Flicker of Maxatown, Vice President, Bruce Latshaw of Alburts R1, Secretary William Zollers of Mertztown R1, Treasurer, Dean Shoemaker of Mertztown R1, Reporter, Ellen Kamp of Kempton

R2 Sentinel, Randy Rabenold of Kutztown R2, Richard Savidge of Mertztown R1, Student Adviser, Dean Bruno of Kutztown.

The chapter also elected Keith Flicker as their delegate to the county association. County officers candidates are Bruce Latshaw and Dean Bruno.

**DAIRYMEN & BEEFMEN . . .** When you make Mol-Mix your "profit-partner," fall and winter feed costs won't get out of hand. Mol-Mix is loaded with all the protein, energy and other nutrients your dairy cattle need for top health and maximum production. It helps avoid those cold weather "slumps" too. Yet, you'll be surprised how economical and easy it is to convert to our labor-saving liquid concept. Stop in soon. We'll tell you how Mol-Mix will help you get a solid grip on profits, so you can . . .

## GET MORE OUT OF WHAT YOU GROW WITH FERTRELL NUTRI-SIL

Dry matter losses of field cured hay range from 17-33%. In a year, that's 1-2 tons of hay per acre. Nutri-Sil gives you an edge on the weather to make good feed better.

### BENEFITS WITH NUTRI-SIL

- 1) Reduces field and storage losses
- 2) Reduces heat damage
- 3) Cuts energy losses in half
- 4) Improves digestibility and palatability
- 5) Cuts run-off losses by nearly 2/3
- 6) Controls fermentation in 7-10 days

University Tests Show Value of Inoculation

Item	Percent preserved in —	
	Inoculated	Untreated
Dry matter	85%	71%
Protein	94	71
Crude Fiber	83	82
Nitrogen free extract	80	67
Energy	88	75

Professor M. E. McCullough, who conducted the research, estimated that inoculation added from \$3 to \$5 to the value of each ton put into the silo. This came from reduced dry matter loss and extra feeding value, equal to 1 to 1 1/2 bushels of corn per ton of silage.

Forage Inoculant  
A probiotic culture.  
Safe, Non-toxic, and  
Easy to Use.

### HOW CAN I HELP MY SOWS FARROW BIG LITTERS?

Feed Purina® Sow Chow, of Course.

Yes, Purina Sow Chow has been built through many years of careful nutritional studies on nearly 6,000 litters of pigs at Purina's Research Farm.

Purina Sow Chow has everything your sow needs to help her develop, farrow and nurse big litters of husky pigs and maintain her own body weight at the same time.

Authorities estimate that 20% to 33% of all pig embryos conceived are resorbed by the sow early in the gestation period, if she is fed a poorly balanced ration. As a result, hogmen who don't feed their sows properly lose lots of pigs they never even see! That's why it pays to feed a proved ration like Purina Sow Chow.

Stop in and see us today about either Purina Sow Chow Complete or Purina Sow Chow Concentrate to mix with your grain.
