

April farm prices down 1% on Index

WASHINGTON, D.C. — The Prices Received Index is down, the first decline in five months. USDA's Crop Reporting Board said the April index of Prices Received by Farmers decreased 2 points (1 pct.) to 244 pct. of its Jan. - Dec. 1967 average.

—Though both cattle and calf prices continued to hit new record highs, lower prices for hogs, oranges, eggs, lettuce and milk combined to bring the index down.

Hog prices came down from \$49.40 per hundredweight in March to \$44.30, milk from \$11.80 per hundredweight to \$11.60; and eggs from 64.3 cents per

dozen to 60.2 cents. Lettuce, which had been at \$20.90 per hundredweight in February and had dropped to \$11.50 in March, was down to \$7.84 per hundredweight last month.

The over-all index was still 36 points (17 pct.) above a

year earlier and the second highest on record.

Meanwhile, the index of Prices Paid by Farmers for Commodities and Services, Interest, Taxes and Farm Wage Rates moved up 2 points (¼ of 1 pct.) to a new record high of 245. It was up 29 points (13 pct.) from a year earlier.

With the Prices Received Index down and the Prices Paid Index up, the Ratio of Prices Received to Prices Paid declined one point to 100. It had been at 96 a year earlier.

Under the old 1910-14 formulas, Prices Received moved down six points to 609, Prices Paid (the Parity Index) moved up 8 points to 834 and the Parity Ratio declined for the second straight month. It had been at 75 in February, dropped to 74 in March and stood at 73 for April. A year ago, it had been 71.

The Index of Prices Received by Farmers may have had sustained increases before over the years, but none as dramatic as that in the past few months. At 218 and what was then the second highest on

record last October, it declined two points — to 216 — in November.

From then on, it moved up steadily on a record high course that was uninterrupted until this past month. While it had moved up dramatically from 182 in July 1973 to 221 in August —

one of the sharpest month-to-month increases in history — the 1979 climb was sure and steady, USDA reports.

First it moved up just six points to a new record high 222 in December. Then to 232 in January. To 241 in February and finally to 246 in March.

PUBLIC SALE
