

## Northern Lebanon FFA team wins

The Northern Lebanon FFA Parliamentary Procedure team, which consists of: front, left to right, Mark Brehm, reporter, Scott Ritchie, president, Tom Donmoyer, treasurer, Dean Patches, vice president. Back, left to right, Randy Behney, sentinel, Paul Gible, advisor, Tom Seaman, secretary and Earnest Meily, chaplain, placed first in the Eastern Regional Parliamentary Procedure contest. The Northern Lebanon team will now compete in the State Championships to be held on June 13th at Penn State.

## Excellent peach season forecast

ATLANTA, Ga. — The beginning of an excellent fresh market peach season was announced recently by the National Peach Council's Southern Marketing Committee.

The group met in Atlanta to review and analyze the prospects for the 1979 fresh market peach crop.

Shipments of early varieties are already reaching the markets from

Florida, Georgia, and South Carolina. The Crop Reporting Board announced that the total crop from the nine Southern states is expected to be only two per cent above last year's crop. This change reflects a substantial increase in South Carolina production. South Carolina leads all the Southern states in the production of fresh market peaches.

Other states in this area reflect production estimates at or slightly below those of a year ago, the committee reported.

The 1979 crop is off to an excellent start with ideal growing conditions which began with favorable Winter conditions and include adequate moisture and sunlight. These factors indicate that buyers and marketers can expect a good supply of high quality fruit now and throughout the balance of the harvesting season.

Shipments of fresh peaches should peak in late June from Georgia, and in early July from South Carolina. These periods will present unusually fine promotional opportunities for peach retailers.

## 4-H beef club meets

YORK - The monthly meeting of the York County 4-H Baby Beef Club was held on May 7 at the home of Mr. & Mrs. Bill Holloway. Before the meeting, Ext. Agent Tony Dobrosky and Bill Holloway, explained live evaluation of beef cattle.

All members who didn't receive booster shots for their steers should call their local leader or Tony Dobrosky. Everyone was told that they must attend

three meetings in order to complete their beef project. The baby beef tour will be in the Dover-Wellsville Area.

Members were asked to help at the food stand and donate baked goods for the Eastern Regional Junior Angus Show to be held at the York Fairgrounds June 30, 1979. Any Angus members who wish to attend the National Junior Angus Heifer Show, can get entry forms from Gail Dennis.

## "ENERGY-PAK"

IS OXYGEN  
CONTROLLED

\*WHAT IS AN "ENERGY-PAK"  
OXYGEN CONTROLLED  
FEED STORAGE SYSTEM?

The "Energy-Pak" "Oxygen Controlled" Storage System includes a solid, steel reinforced concrete wall with a tough epoxy coating on the inside wall and a cone shaped concrete roof. All access openings to the Silage Storage area are round and fitted with air-tight gaskets. These round openings are easily clamped tight. These features help to control and limit the amount of oxygen that comes in contact with the feed.

In operating an "Energy-Pak", prime importance is placed on closing the silo after each filling and feeding operation. Proper use of this system significantly reduces the oxygen content in the silo and results in a more ideal condition for maintaining the quality of the feed put into it.

## CONSUMER GUIDELINES

**Low-Calorie**  
Beginning this summer, consumers can be sure what "low-calorie" means on food labels. Regulations will require foods labeled "low-calorie" that are shipped across state lines contain no more than 40 calories per serving. The label must show the number of calories, amount or protein, carbohydrate and fat in each serving, and the percentage of U.S. Recommended Daily Allowances for the seven vitamins and minerals.

## UNIFORM CHOICE
