THAT WORKS.

UNITE is Hopkins totally new compatibility agent with a unique chemistry that assures uniform dispersion of active ingredients in liquid fertilizer-pesticide mixtures. UNITE prevents separation and coagulation. Time tests prove no unwanted changes in many mixtures even after 24 hours. With UNITE, what you put together stays together.

A little UNITE gives you trouble-free spraying, accurate application, more effective pesticide results. Economical too — use 1-3 pints per 100 gallons.

- Lorox 50W
- Princep
- Supracide 2E
- Tillam
- Weedar 64
- Weedone LV4

Only Banvel herbicide offers so many ways to control weeds.

You can use Banvel herbicide at more different times in the corn production cycle than many other herbicides.

Pre-emergence Tank mixed with "Lasso" to control both grasses and broadleaf weeds.

Early layby In corn up to 5 inches. Banvel as an overlay at a one pint rate gets early and late weeds.

Post-emergence In corn up to 36 inches. Banvel gets rid of many tough-to-kill weeds that 2,4-D misses — and of course the easy weeds, too.

Fall treatment Air application knocks down hemp dogbane, permitting easier harvest.

Tough-to-get weeds On the Banvel label, note the stubborn species that Banvel controls.

Rescue When weeds threaten a takeover (you couldn't get into the field earlier), Banvel can help save your crop.

Come see us now for your supply of Banvel herbicide — the Big Plus — from Velsicol!

Lasso is a registered trademark of Monsanto Company. The Lasso tank mix is cleared for use in Colorado, Illinois, Indiana, Kentucky, Michigan, Minnesota, Missouri, Montana, New York, North Dakota, Ohio, Pennsylvania, South Dakota, Utah, and Wisconsin. Registered in herbicide and tank mix.
