Reduce Your Mowing Time Drastically ...

Cut, and 'Finish' trim all in one pass.

In 44", 52" and 61" Mower Deck Widths

Zero Turning Radius - As one drive wheel moves forward while the other moves in reverse the Turning Axis becomes located halfway between the wheels thus a 0 turning radius

Check These Big Mower Features

- Direct power input to hydrostatic units eliminates cumbersome belt drives and leaky hydraulic lines
- Mower deck is shaft driven to assure consistent blade-speed throughout any cutting assignment
- Drive shaft plus two pin attachment affords quick, easy deck removal
- 12 or 16 hp Kohler or Briggs engine creates outstanding power-to-cutting-width ratio for maintaining blade speed dependability
- Consistent blade-speed assures total maneuverability at maximum mowing speeds
- Rugged, compact design, with low center of gravity, places operator directly above wheels for stability and traction on slopes
- Rigid lateral bracing prevents abrupt downward scalping action when single wheel passes over lowspot
- Operator rides in natural sitting position on fully padded, high-back seat
- Design simplicity and accessibility encourages routine tractor maintenance
